Septic System Setback Certification for Lawn Irrigation Systems

Complete and return this form along with a plot plan which contains the following details:

- The layout and location of the onsite septic system.
- The layout and location of the pressurized water service lines and sprinkler heads with distance setbacks to the septic system clearly labeled.

The *Standards for Individual Subsurface Sewage Disposal Systems*, NJAC 7:9A-4.3, establishes minimum separation distances required between pressurized water service lines and the components of septic systems as listed below.

Building sewer	5 feet	D-Box	10 feet
Septic Tank	10 feet	Disposal Field	10 Feet

Block: _____ Lot: _____

Property Location: _____

Owner: _____ Phone: _____

Installer: _____ Phone: _____

Address: _____

I certify the lawn irrigation system proposed for the above property will be installed with the minimum required setbacks from all components of the septic system in accordance with NJAC 7:9A-4.3.
