VIA Zoom Video Communications***

**AGENDA FOR A BUSINESS SESSION MEETING
OF THE TOWNSHIP COUNCIL OF WEST WINDSOR TOWNSHIP
WEST WINDSOR MUNICIPAL BUILDING
271 CLARKSVILLE ROAD
TO THE EXTENT KNOWN**

June 12, 2023

7:00 P.M.

1. Call to Order
2. Roll Call
3. Statement of Adequate Notice - January 13, 2023 to The Times and the Princeton Packet and posted on the Township web-site. All Council meetings are open to the public with access via Zoom for those who wish to attend virtually. Please see Township web-site for further details.
4. Salute to the Flag
5. Ceremonial Matters and/or Topics for Priority Consideration
Recognition of Robotics Teams
6. Public Comment: (30 minutes comment period; 3-minute limit per person)
7. Administration Comments
8. Council Member Comments
9. Chair/Clerk Comments
10. Public Hearings

2023-03 AN ORDINANCE REPEALING THE FLOOD DAMAGE AND PREVENTION PROVISIONS AND ADOPTING FLOODPLAIN MANAGEMENT REGULATIONS OF CHAPTER 200 OF THE CODE OF THE TOWNSHIP OF WEST WINDSOR (1999)

11. Consent Agenda

A. Resolutions

B. Minutes

April 10, 2023 - Business Session - As Amended
April 10, 2023 - Closed Session
April 24, 2023 - Business Session - As Amended
May 8, 2023 - Closed Session
May 8, 2023 - Business Session

C. Bills & Claims

12. Items Removed from Consent Agenda

13. Recommendations from Administration and Council/Clerk

2023-R111 Approval of Liquor License Renewals for 2023/2024

2023-R112 Authorizing the Business Administrator to
Purchase from Packetalk a State Contract Vendor
Criminal and Traffic Investigation Equipment -
\$11,000.00

2023-R113 Authorizing the Business Administrator to
Purchase from Packetalk a State Contract Vendor
Criminal and Traffic Investigation Equipment -
\$11,000.00

2023-R114 Authorizing the Chief Financial Officer to
Increase the Professional Services Contract for
the Law Offices of Gerald Muller, P.C. for
Affordable Housing Legal Fees - \$100,000.00

2023-R115 Authorizing the Insertion of a Special Item of
Revenue Into the 2023 Municipal Budget from the
New Jersey Hospital Association Grant -
\$90,214.50

2023-R116 Authorizing the Insertion of a Special Item of
Revenue Into the 2023 Municipal Budget from the
State of New Jersey Division of Highway Traffic
Safety 2023 Click It or Ticket Grant - \$7,000.00

- 2023-R117 Authorizing the Insertion of a Special Item of Revenue Into the 2023 Municipal Budget from the State of New Jersey Clean Communities Program - \$72,214.96
- 2023-R118 Authorizing the Mayor and Clerk to Execute a Professional Services Agreement with ACT Engineers to Continue Monitoring Services of the Former West Windsor Township Landfill/Compost Facility - \$10,000.00
- 2023-R119 Authorizing the Mayor and Clerk to Execute a Contract with Montana Construction Corporation for the Project Known as Duck Pond Interceptor-Phase 2 - \$4,344,111.00
- 2023-R120 Approving the Request for an Extension of Three Months from the New Jersey Department of Transportation for LA-2021 MA West Windsor Township Rabbit Hill Road Roadway Reconstruction Project to August 2023
- 2023-R121 Approving the Request for a Permit from L.E.A.D. Festival for Public Fireworks Displays on June 30, July 3, July 4, July 8, 2023 (no scheduled rain dates) at Mercer County Park
- 2023-R122 Authorizing the Business Administrator to Purchase from SHI International Corporation an Authorized State Contract Vendor Computer Equipment and Peripherals - \$14,532.03
- 2023-R123 Authorizing the Mayor and Clerk to Execute a Land Development Performance Guarantee Agreement for ROW for Mercer County, Safety & Stabilization and Monumentation for the Project Known as K. Hovnanian's "The Townes at West Windsor LLC"
- 2023-R124 Authorizing the Mayor and Clerk to Execute a Land Development Performance Guarantee Agreement for ROW for Mercer County, for the Project Known as K. Hovnanian's "The Townes at West Windsor LLC"
- 2023-R125 Authorizing the Business Administrator to Purchase from Gen-el Safety & Industrial Products a State Contract Vendor Honeywell's AreaRAE Radiation Detection Kit - \$82,714.50

14. Introduction of Ordinances
15. Additional Public Comment (15 minute comment period; three-minute limit per person)
16. Council Reports/Discussion/New Business
17. Administration Updates
18. Closed Session
19. Adjournment

****The Township Council will continue to use Zoom for public interaction at Council Meetings in 2023. This is for the convenience of the public and is not a legal requirement under the Open Public Meetings Act at this time. If technical difficulties occur during a meeting the Township Clerk (or designee) will make the decision as to whether the meeting will continue on Zoom. If it is decided that Zoom must be discontinued this will not affect the Council meeting from continuing under the Open Public Meetings Act because the use of Zoom is for the convenience of the public and not a legal requirement. All Council Meetings will continue to be live streamed on YouTube. The use of YouTube is not a legal requirement under the Open Public Meetings Act and will not constitute the need to stop the Township Council meeting if technical difficulties occur. Per Resolution 2023-03***

ORDINANCE 2023-03

**AN ORDINANCE TO AMEND AND SUPPLEMENT
THE CODE OF THE TOWNSHIP OF WEST WINDSOR (1999)**

**AN ORDINANCE REPEALING THE FLOOD DAMAGE AND PREVENTION
PROVISIONS AND ADOPTING FLOODPLAIN MANAGEMENT REGULATIONS
OF CHAPTER 200 OF THE CODE OF THE
TOWNSHIP OF WEST WINDSOR (1999)**

WHEREAS, the Legislature of the State of New Jersey has, in N.J.S.A. 40:48 et seq and N.J.S.A. 40:55D et seq., conferred upon local governments the authority to adopt regulations designed to promote the public health, safety, and general welfare of its citizenry; and

WHEREAS, the Federal Emergency Management Agency has identified special flood hazard areas within the boundaries of **Township of West Windsor** and such areas may be subject to periodic inundation which may result in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief, and impairment of the tax base, all of which adversely affect the public health, safety and general welfare, and

WHEREAS, the **Township of West Windsor** was accepted for participation in the National Flood Insurance Program on **May 1, 1984** and the **Township Council** desires to continue to meet the requirements of Title 44 Code of Federal Regulations, Sections 59, 60, 65 and 70 necessary for such participation; and

WHEREAS, the **Township of West Windsor** is required, pursuant to N.J.A.C. 5:23 et seq., to administer and enforce the State building codes, and such building codes contain certain provisions that apply to the design and construction of buildings and structures in flood hazard areas; and

WHEREAS, the **Township of West Windsor** is required, pursuant to N.J.S.A. 40:49-5, to enforce zoning codes that secure safety from floods and contain certain provisions that apply to the development of lands; and

WHEREAS, the **Township of West Windsor** is required, pursuant to N.J.S.A.58:16A-57, within 12 months after the delineation of any flood hazard area, to adopt rules and regulations concerning the development and use of land in the flood fringe area which at least conform to the standards promulgated by the New Jersey Department of Environmental Protection (NJDEP).

NOW, THEREFORE, BE IT ORDAINED by the Township Council of the Township of West Windsor, County of Mercer, State of New Jersey, as follows:

Section 1. Chapter 200 of the Code of the Township of West Windsor (1999), Land Use, Part 1, Site Plan Review, Article II, Terminology, Section 200-4, Definitions, is amended by adding or

amending the following definitions. Language in brackets and struck through [~~struck through~~] is being deleted and in **bold and underlined** is being added.

~~[A ZONE—Areas subject to inundation by the 1-percent annual-chance flood event generally determined using approximate methodologies. Because detailed hydraulic analyses have not been performed, no Base Flood Elevations (BFEs) or flood depths are determined, as designated on the Flood Insurance Rate Map (FIRM).]~~

~~[AE ZONE—Areas subject to inundation by the 1-percent annual-chance flood event determined by detailed methods. Base Flood Elevations (BFEs) are determined, as designated on the Flood Insurance Rate Map (FIRM).]~~

~~[AH ZONE—Areas subject to inundation by 1-percent annual-chance shallow flooding (usually areas of ponding) where average depths are between one and three feet, as designated on the Flood Insurance Rate Map (FIRM). Base Flood Elevations (BFEs) derived from detailed hydraulic analyses are shown in this zone.]~~

~~[AO ZONE—Areas subject to inundation by 1-percent annual-chance shallow flooding (usually sheet flow on sloping terrain) where average depths are between one and three feet, as designated on the Flood Insurance Rate Map (FIRM). Average flood depths derived from detailed hydraulic analyses are shown in this zone.]~~

~~[AREA OF SHALLOW FLOODING—A designated AO or AH zone on the Township of West Windsor's Flood Insurance Rate Map (FIRM) with a one-percent annual or greater chance of flooding to an average depth of one to three feet, where a clearly defined channel does not exist, where the path of flooding is unpredictable, and where velocity flow may be evident. Such flooding is characterized by ponding or sheet flow.]~~

~~[BASE FLOOD ELEVATION (BFE)—The flood elevation shown on a published Flood Insurance Study (FIS) including the Flood Insurance Rate Map (FIRM). For zones AE, AH, and AO the elevation represents the water surface elevation resulting from a flood that has a 1-percent or greater chance of being equaled or exceeded in any given year.]~~

~~[BREAKAWAY WALL—A wall that is not part of the structural support of the building and is intended through its design and construction to collapse under specific lateral loading forces without causing damage to the elevated portion of the building or supporting foundation system.]~~

~~[ELEVATED BUILDING—A nonbasement building built, in the case of a building in an Area of Special Flood Hazard, to have the top of the elevated floor elevated above the base flood elevation plus freeboard by means of piling, columns (posts and piers), or shear walls parallel to the flow of the water, and (ii) adequately anchored so as not to impair the structural integrity of the building during a flood up to the magnitude of the base flood. In an Area of Special Flood Hazard elevated buildings shall also include a building elevated by means of fill or solid foundation perimeter walls with openings sufficient to facilitate the unimpeded movement of flood waters.]~~

FLOOD INSURANCE RATE MAP (FIRM)- The official map on which the Federal [Insurance Administration] **Emergency Management Agency (FEMA)** has delineated both the areas of special flood hazards and the risk premium zones applicable to the community.

FLOOD INSURANCE STUDY - The official report provided in which the Federal [Insurance Administration] **Emergency Management Agency (FEMA)** has provided flood profiles, as well as the Flood Boundary - Floodway Map and the water surface elevation of the base flood.

~~[FLOODPROOFING — Any combination of structural and nonstructural additions, changes, or adjustments to structures which reduce or eliminate flood damage to real estate or improved real property, water and sanitary facilities, structures and their contents.]~~

~~[FREEBOARD — A factor of safety usually expressed in feet above a flood level for purposes of flood plain management. “Freeboard” tends to compensate for the many unknown factors that could contribute to flood heights greater than the height calculated for a selected size flood and floodway conditions, such as wave action, bridge openings, and the hydrological effect of urbanization of the watershed.]~~

~~[HIGHEST ADJACENT GRADE — The highest natural elevation of the ground surface prior to construction next to the proposed or existing walls of a structure.]~~

HISTORIC STRUCTURE — Any structure that is:

- a) Listed individually in the National Register of Historic Places (a listing maintained by the Department of Interior) or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register;
- b) Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary to qualify as a registered historic district;
- c) Individually listed on the State of New Jersey inventory of historic places if the State has a historic preservation program which have been approved by the Secretary of the Interior.
- d) **Individually listed on a local inventory of historic places in communities with historic preservation programs that have been certified either:**
 1. **By an approved State program as determined by the Secretary of the Interior; or**
 2. **Directly by the Secretary of the Interior in States without approved programs.**

LOWEST FLOOR – The top surface of the lowest floor of the lowest enclosed area (including basement). An unfinished or flood resistant enclosure, useable solely for the parking of vehicles, building access or storage in an area other than a basement is not considered a building's lowest floor provided that such enclosure is not built so to render the structure in violation of other applicable non-elevation design requirements of 44 CFR Section 60.3.

~~[NEW CONSTRUCTION—Structures for which the start of construction commenced on or after the effective date of floodplain regulations adopted by the Township of West Windsor and includes any subsequent improvements to such structures.]~~

~~[NEW MANUFACTURED HOME PARK OR SUBDIVISION—For floodplain management purposes, the term “new manufactured home park or subdivision” shall be defined as a manufactured home park or subdivision for which the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed on or after the effective date of the floodplain management regulations adopted by the municipality.]~~

~~[RECREATIONAL VEHICLE—A vehicle which is (i) built on a single chassis; (ii) 400 square feet or less when measured at the longest horizontal projections; (iii) designed to be self-propelled or permanently towable by a light duty truck; and (iv) designed primarily not for use as a permanent dwelling but as temporary living quarters for recreational, camping, travel, or seasonal use.]~~

~~[START OF CONSTRUCTION—Shall include substantial improvement and shall mean the building permit was issued, provided that the actual start of construction, repairs, reconstruction, placement or other improvement was within 180 days of the permit. The “actual start” shall mean either the first placement of permanent construction of a structure on a site, such as the pouring of a slab or footings, the installation of piles, the construction of columns or any work beyond the stage of excavation or the placement of a manufactured home on a foundation. Permanent construction does not include land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers or foundations or the erection of temporary forms; nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or not part of the main structure. For a substantial improvement, the actual start of construction means the first alteration of any wall, ceiling, floor, or other structural part of a building, whether or not that alteration affects the external dimensions of the building.]~~

~~[SUBSTANTIAL DAMAGE—Damage of any origin sustained by a structure whereby the cost of restoring the structure to its condition before damage would equal or exceed 50 percent of the market value of the structure before the damage occurred.]~~

~~[SUBSTANTIAL IMPROVEMENT—Any reconstruction, rehabilitation, addition, or other improvement of a structure, the cost of which equals or exceeds 50 percent of the~~

~~market value of the structure before the “start of construction” of the improvement. This term includes structures which have incurred “substantial damage,” regardless of the actual repair work performed. The term does not, however, include either:~~

- ~~a) Any project for improvement of a structure to correct existing violations of State or local health, sanitary or safety code specifications which have been identified by the local code enforcement officer and which are the minimum necessary to assure safe living conditions; or~~
- ~~b) Any alteration of a “historic structure,” provided that the alteration will not preclude the structure’s continued designation as a “historic structure.”]~~

Section 2. These regulations specifically repeal and replace the following regulation(s): Chapter 200 of the Code of the Township of West Windsor (1999), Land Use, Part 6, Flood Damage and Prevention, in their entirety, with the following text:

Part 6
Floodplain Management Regulations

Article XXXV
Scope and Administration

200-270.1. Title. These regulations, in combination with the flood provisions of the Uniform Construction Code (UCC) N.J.A.C. 5:23 (hereinafter “Uniform Construction Code,” consisting of the Building Code, Residential Code, Rehabilitation Subcode, and related codes, and the New Jersey Flood Hazard Area Control Act (hereinafter “FHACA”), N.J.A.C. 7:13, shall be known as the *Floodplain Management Regulations* of Township of West Windsor (hereinafter “these regulations”).

200-270.2. Scope. These regulations, in combination with the flood provisions of the Uniform Construction Code and FHACA shall apply to all proposed development in flood hazard areas established in Section 200-272.1 *et seq* of these regulations.

200-270.3. Purposes and objectives. The purposes and objectives of these regulations are to promote the public health, safety and general welfare and to minimize public and private losses due to flood conditions in specific flood hazard areas through the establishment of comprehensive regulations for management of flood hazard areas, designed to:

- A. Protect human life and health.
- B. Prevent unnecessary disruption of commerce, access, and public service during times of flooding.
- C. Manage the alteration of natural floodplains, stream channels and shorelines;
- D. Manage filling, grading, dredging and other development which may increase

flood damage or erosion potential.

- E. Prevent or regulate the construction of flood barriers which will divert floodwater or increase flood hazards.
- F. Contribute to improved construction techniques in the floodplain.
- G. Minimize damage to public and private facilities and utilities.
- H. Help maintain a stable tax base by providing for the sound use and development of flood hazard areas.
- I. Minimize the need for rescue and relief efforts associated with flooding.
- J. Ensure that property owners, occupants, and potential owners are aware of property located in flood hazard areas.
- K. Minimize the need for future expenditure of public funds for flood control projects and response to and recovery from flood events.
- L. Meet the requirements of the National Flood Insurance Program for community participation set forth in Title 44 Code of Federal Regulations, Section 59.22.

200-270.4. Coordination with Building Codes. Pursuant to the requirement established in N.J.A.C. 5:23, the Uniform Construction Code, that the Township of West Windsor administer and enforce the State building codes, the Township Council of Township of West Windsor does hereby acknowledge that the Uniform Construction Code contains certain provisions that apply to the design and construction of buildings and structures in flood hazard areas. Therefore, these regulations are intended to be administered and enforced in conjunction with the Uniform Construction Code.

200-270.5. Ordinary Building Maintenance and Minor Work. Improvements defined as ordinary building maintenance and minor work projects by the Uniform Construction Code including non-structural replacement-in-kind of windows, doors, cabinets, plumbing fixtures, decks, walls, partitions, new flooring materials, roofing, etc. shall be evaluated by the Floodplain Administrator through the floodplain development permit to ensure compliance with Section 200-273.13 Substantial Improvement and Substantial Damage.

200-270.6. Warning. The degree of flood protection required by these regulations is considered reasonable for regulatory purposes and is based on scientific and engineering considerations. Larger floods can and will occur. Flood heights may be increased by man-made or natural causes. Enforcement of these regulations does not imply that land outside the special flood hazard areas, or that uses permitted within such flood hazard areas, will be free from flooding or flood damage.

200-270.7. Other laws. The provisions of these regulations shall not be deemed to nullify any provisions of local, State, or Federal law.

200-270.8. Violations and Penalties for Noncompliance. No structure or land shall hereafter be constructed, re-located to, extended, converted, or altered without full

compliance with the terms of this ordinance and other applicable regulations. Violation of the provisions of this ordinance by failure to comply with any of its requirements (including violations of conditions and safeguards established in connection with conditions) shall constitute a violation under N.J.S.A. 40:49-5.

Any person who violates or fails to comply with any of the requirements of this Part 6 shall be subject to the penalties provided in Article II, Section 1-3 of the Township Code.

Each day in which a violation of an ordinance exists shall be considered to be a separate and distinct violation subject to the imposition of a separate penalty for each day of the violation as the Court may determine except that the owner will be afforded the opportunity to cure or abate the condition during a 30-day period and shall be afforded the opportunity for a hearing before the court for an independent determination concerning the violation. Subsequent to the expiration of the 30-day period, a fine greater than provided for in Article II, Section 1-3 may be imposed if the court has not determined otherwise, or if upon reinspection of the property, it is determined that the abatement has not been substantially completed.

Any person who is convicted of violating an ordinance within one year of the date of a previous violation of the same ordinance and who was fined for the previous violation, shall be sentenced by a court to an additional fine as a repeat offender. The additional fine imposed by the court upon a person for a repeated offense shall not be less than the minimum or exceed the maximum fine fixed for a violation of the ordinance, but shall be calculated separately from the fine imposed for the violation of the ordinance.

- A. **Solid Waste Disposal in a Flood Hazard Area.** Any person who has unlawfully disposed of solid waste in a floodway or floodplain who fails to comply with this ordinance, or fails to comply with any of its requirements, shall upon conviction thereof be fined not more than \$2,500 or up to a maximum penalty by a fine not exceeding \$10,000 under N.J.S.A. 40:49-5.

200-270.9. Abrogation and greater restrictions. These regulations supersede any ordinance in effect in flood hazard areas. However, these regulations are not intended to repeal or abrogate any other land use regulations including site plan and subdivision regulations, zoning ordinances, stormwater management regulations, or building codes. In the event of a conflict between these regulations and any other ordinance, code, or regulation, the more restrictive shall govern.

Article XXXVI
Terminology

200-271.1. General. The following words and terms shall, for the purposes of these regulations, have the meanings shown herein. Other terms are defined in the Uniform Construction Code N.J.A.C. 5:23 and terms are defined where used in the International Residential Code and International Building Code (rather than in the Definitions section). Common acronyms and abbreviations as utilized in this Part 6 are as follows:

- ASCE – “American Society of Civil Engineers”
- FEMA – “Federal Emergency Management Agency”
- FHACA – “New Jersey Flood Hazard Area Control Act”
- FIS – “Flood Insurance Study”
- FIRM – “Flood Insurance Rate Map”

Where terms are not defined, such terms shall have ordinarily accepted meanings such as the context implies.

200-271.2. Definitions

30 DAY PERIOD – The period of time prescribed by N.J.S.A. 40:49-5 in which a property owner is afforded the opportunity to correct zoning and solid waste disposal after a notice of violation pertaining to this ordinance has been issued.

100 YEAR FLOOD ELEVATION – Elevation of flooding having a 1% annual chance of being equaled or exceeded in a given year which is also referred to as the Base Flood Elevation.

500 YEAR FLOOD ELEVATION – Elevation of flooding having a 0.2% annual chance of being equaled or exceeded in a given year.

A ZONES – Areas of “Special Flood Hazard in which the elevation of the surface water resulting from a flood that has a 1% annual chance of equaling or exceeding the Base Flood Elevation (BFE) in any given year shown on the Flood Insurance Rate Map (FIRM) zones A, AE, AH, A1–A30, AR, AR/A, AR/AE, AR/A1– A30, AR/AH, and AR/AO.

AH ZONES– Areas subject to inundation by 1-percent-annual-chance shallow flooding (usually areas of ponding) where average depths are between one and three feet. Base Flood Elevations (BFEs) derived from detailed hydraulic analyses are shown in this zone.

AO ZONES – Areas subject to inundation by 1-percent-annual-chance shallow flooding (usually sheet flow on sloping terrain) where average depths are between one and three feet.

ACCESSORY STRUCTURE – Accessory structures are also referred to as appurtenant structures. An accessory structure is a structure which is on the same parcel of property

as a principal structure and the use of which is incidental to the use of the principal structure. For example, a residential structure may have a detached garage or storage shed for garden tools as accessory structures. Other examples of accessory structures include gazebos, picnic pavilions, boathouses, small pole barns, storage sheds, and similar buildings.

AGRICULTURAL STRUCTURE - A structure used solely for agricultural purposes in which the use is exclusively in connection with the production, harvesting, storage, drying, or raising of agricultural commodities, including the raising of livestock. Communities must require that new construction or substantial improvements of agricultural structures be elevated or floodproofed to or above the Base Flood Elevation (BFE) as any other nonresidential building. Under some circumstances it may be appropriate to wet-floodproof certain types of agricultural structures when located in wide, expansive floodplains through issuance of a variance. This should only be done for structures used for temporary storage of equipment or crops or temporary shelter for livestock and only in circumstances where it can be demonstrated that agricultural structures can be designed in such a manner that results in minimal damage to the structure and its contents and will create no additional threats to public safety. New construction or substantial improvement of livestock confinement buildings, poultry houses, dairy operations, similar livestock operations and any structure that represents more than a minimal investment must meet the elevation or dry-floodproofing requirements of 44 CFR 60.3(c)(3).

AREA OF SHALLOW FLOODING – A designated Zone AO, AH, AR/AO or AR/AH on a community’s Flood Insurance Rate Map (FIRM) with a one percent or greater annual chance of flooding to an average depth of one to three feet where a clearly defined channel does not exist, where the path of flooding is unpredictable, and where velocity flow may be evident. Such flooding is characterized by ponding or sheet flow. **AREA OF SPECIAL FLOOD HAZARD** – see SPECIAL FLOOD HAZARD AREA

ALTERATION OF A WATERCOURSE – A dam, impoundment, channel relocation, change in channel alignment, channelization, or change in cross-sectional area of the channel or the channel capacity, or any other form of modification which may alter, impede, retard or change the direction and/or velocity of the riverine flow of water during conditions of the base flood.

ASCE 7 – The standard for the Minimum Design Loads for Buildings and Other Structures, referenced by the building code and developed and published by the American Society of Civil Engineers, Reston, VA. which includes but is not limited to methodology and equations necessary for determining structural and flood-related design requirements and determining the design requirements for structures that may experience a combination of loads including those from natural hazards. Flood related equations include those for determining erosion, scour, lateral, vertical, hydrostatic, hydrodynamic, buoyancy, breaking wave, and debris impact.

ASCE 24 – The standard for Flood Resistant Design and Construction, referenced by the

building code and developed and published by the American Society of Civil Engineers, Reston, VA. References to ASCE 24 shall mean ASCE 24-14 or the most recent version of ASCE 24 adopted in the UCC Code [N.J.A.C. 5:23].

BASE FLOOD ELEVATION (BFE) – The water surface elevation resulting from a flood that has a 1-percent or greater chance of being equaled or exceeded in any given year, as shown on a published Flood Insurance Study (FIS), or preliminary flood elevation guidance from FEMA. May also be referred to as the “100-year flood elevation”.

BASEMENT – Any area of the building having its floor subgrade (below ground level) on all sides.

BEST AVAILABLE FLOOD HAZARD DATA - The most recent available preliminary flood risk guidance FEMA has provided. The Best Available Flood Hazard Data may be depicted on but not limited to Advisory Flood Hazard Area Maps, Work Maps, or Preliminary FIS and FIRM.

BEST AVAILABLE FLOOD HAZARD DATA AREA- The areal mapped extent associated with the most recent available preliminary flood risk guidance FEMA has provided. The Best Available Flood Hazard Data may be depicted on but not limited to Advisory Flood Hazard Area Maps, Work Maps, or Preliminary FIS and FIRM.

BEST AVAILABLE FLOOD HAZARD DATA ELEVATION - The most recent available preliminary flood elevation guidance FEMA has provided. The Best Available Flood Hazard Data may be depicted on but not limited to Advisory Flood Hazard Area Maps, Work Maps, or Preliminary FIS and FIRM.

BREAKAWAY WALLS – Any type of wall subject to flooding that is not required to provide structural support to a building or other structure and that is designed and constructed such that, below the Local Design Flood Elevation, it will collapse under specific lateral loads such that (1) it allows the free passage of floodwaters, and (2) it does not damage the structure or supporting foundation system.

BUILDING – Per the FHACA, “Building” means a structure enclosed with exterior walls or fire walls, erected and framed of component structural parts, designed for the housing, shelter, enclosure, and support of individuals, animals, or property of any kind. A building may have a temporary or permanent foundation. A building that is intended for regular human occupation and/or residence is considered a habitable building.

CONDITIONAL LETTER OF MAP REVISION - A Conditional Letter of Map Revision (CLOMR) is FEMA's comment on a proposed project that would, upon construction, affect the hydrologic or hydraulic characteristics of a flooding source and thus result in the modification of the existing regulatory floodway, the effective Base Flood Elevations (BFEs), or the Special Flood Hazard Area (SFHA). The letter does not revise an effective NFIP map, it indicates whether the project, if built as proposed, would be recognized by FEMA. FEMA charges a fee for processing a CLOMR to recover the costs associated

with the review that is described in the Letter of Map Change (LOMC) process. Building permits cannot be issued based on a CLOMR, because a CLOMR does not change the NFIP map.

CONDITIONAL LETTER OF MAP REVISION - FILL -- A Conditional Letter of Map Revision - Fill (CLOMR-F) is FEMA's comment on a proposed project involving the placement of fill outside of the regulatory floodway that would, upon construction, affect the hydrologic or hydraulic characteristics of a flooding source and thus result in the modification of the existing regulatory floodway, the effective Base Flood Elevations (BFEs), or the Special Flood Hazard Area (SFHA). The letter does not revise an effective NFIP map, it indicates whether the project, if built as proposed, would be recognized by FEMA. FEMA charges a fee for processing a CLOMR to recover the costs associated with the review that is described in the Letter of Map Change (LOMC) process. Building permits cannot be issued based on a CLOMR, because a CLOMR does not change the NFIP map.

CRITICAL BUILDING – Per the FHACA, “Critical Building” means that:

- a. It is essential to maintaining continuity of vital government operations and/or supporting emergency response, sheltering, and medical care functions before, during, and after a flood, such as a hospital, medical clinic, police station, fire station, emergency response center, or public shelter; or
- b. It serves large numbers of people who may be unable to leave the facility through their own efforts, thereby hindering or preventing safe evacuation of the building during a flood event, such as a school, college, dormitory, jail or detention facility, day care center, assisted living facility, or nursing home.

DEVELOPMENT – Any manmade change to improved or unimproved real estate, including but not limited to, buildings or other structures, tanks, temporary structures, temporary or permanent storage of materials, mining, dredging, filling, grading, paving, excavations, drilling operations and other land-disturbing activities.

DRY FLOODPROOFING – A combination of measures that results in a non-residential structure, including the attendant utilities and equipment as described in the latest version of ASCE 24, being watertight with all elements substantially impermeable and with structural components having the capacity to resist flood loads.

ELEVATED BUILDING – A building that has no basement and that has its lowest elevated floor raised above ground level by foundation walls, shear walls, posts, piers, pilings, or columns. Solid perimeter foundations walls are not an acceptable means of elevating buildings in V and VE Zones.

ELEVATION CERTIFICATE – An administrative tool of the National Flood Insurance Program (NFIP) that can be used to provide elevation information, to determine the proper insurance premium rate, and to support an application for a Letter of Map Amendment

(LOMA) or Letter of Map Revision based on fill (LOMR-F).

ENCROACHMENT – The placement of fill, excavation, buildings, permanent structures or other development into a flood hazard area which may impede or alter the flow capacity of riverine flood hazard areas.

FEMA PUBLICATIONS – Any publication authored or referenced by FEMA related to building science, building safety, or floodplain management related to the National Flood Insurance Program. Publications shall include but are not limited to technical bulletins, desk references, and American Society of Civil Engineers Standards documents including ASCE 24.

FLOOD OR FLOODING

- a. A general and temporary condition of partial or complete inundation of normally dry land areas from:
 1. The overflow of inland or tidal waters.
 2. The unusual and rapid accumulation or runoff of surface waters from any source.
 3. Mudslides (I.e. mudflows) which are proximately caused by flooding as defined in (a) (2) of this definition and are akin to a river or liquid and flowing mud on the surfaces of normally dry land areas, as when earth is carried by a current of water and deposited along the path of the current.
- b. The collapse or subsidence of land along the shore of a lake or other body of water as a result of erosion or undermining caused by waves or currents of water exceeding anticipated cyclical levels or suddenly caused by an unusually high water level in a natural body of water, accompanied by a severe storm, or by an unanticipated force of nature, such as flash flood or an abnormal tidal surge, or by some similarly unusual and unforeseeable event which results in flooding as defined in paragraph (a)(1) of this definition.

FLOOD HAZARD AREA DESIGN FLOOD ELEVATION – Per the FHACA, the peak water surface elevation that will occur in a water during the flood hazard area design flood. This elevation is determined via available flood mapping adopted by the State, flood mapping published by FEMA (including effective flood mapping dated on or after January 31, 1980, or any more recent advisory, preliminary, or pending flood mapping; whichever results in higher flood elevations, wider floodway limits, or greater flow rates), approximation, or calculation pursuant to the Flood Hazard Area Control Act Rules at N.J.A.C. 7:13-3.1 – 3.6 and is typically higher than FEMA's base flood elevation. A water that has a drainage area measuring less than 50 acres does not possess, and is not assigned, a flood hazard area design flood elevation.

FLOOD INSURANCE RATE MAP (FIRM) – The official map on which the Federal Emergency Management Agency has delineated both the areas of special flood hazards and the risk premium zones applicable to the community.

FLOOD INSURANCE STUDY (FIS) – The official report in which the Federal Emergency Management Agency has provided flood profiles, as well as the Flood Insurance Rate Map(s) and the water surface elevation of the base flood.

FLOODPLAIN OR FLOOD PRONE AREA – Any land area susceptible to being inundated by water from any source. See "Flood or flooding."

FLOODPLAIN MANAGEMENT REGULATIONS – Zoning ordinances, subdivision regulations, building codes, health regulations, special purpose ordinances (such as a floodplain ordinance, grading ordinance, and erosion control ordinance) and other applications of police power. The term describes such State or local regulations, in any combination thereof, which provide standards for the purpose of flood damage prevention and reduction.

FLOODPROOFING – Any combination of structural and nonstructural additions, changes, or adjustments to structures which reduce or eliminate flood damage to real estate or improved real property, water and sanitary facilities, structures, and their contents.

FLOODPROOFING CERTIFICATE – Certification by a licensed design professional that the design and methods of construction for floodproofing a non-residential structure are in accordance with accepted standards of practice to a proposed height above the structure's lowest adjacent grade that meets or exceeds the Local Design Flood Elevation. A completed floodproofing certificate is required at permit application.

FLOODWAY – The channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than 0.2 foot.

FREEBOARD – A factor of safety usually expressed in feet above a flood level for purposes of floodplain management. "Freeboard" tends to compensate for the many unknown factors that could contribute to flood heights greater than the height calculated for a selected size flood and floodway conditions, such as wave action, bridge openings, and the hydrological effect of urbanization of the watershed.

FUNCTIONALLY DEPENDENT USE – A use that cannot perform its intended purpose unless it is located or carried out in close proximity to water, including only docking facilities, port facilities necessary for the loading or unloading of cargo or passengers, and shipbuilding and ship repair facilities. The term does not include long-term storage or related manufacturing facilities.

HABITABLE BUILDING– Pursuant to the FHACA Rules (N.J.A.C. 7:13), means a building that is intended for regular human occupation and/or residence. Examples of a habitable building include a single-family home, duplex, multi-residence building, or critical building; a commercial building such as a retail store, restaurant, office building, or gymnasium; an accessory structure that is regularly occupied, such as a garage, barn, or workshop; mobile and manufactured homes, and trailers intended for human residence,

which are set on a foundation and/or connected to utilities, such as in a mobile home park (not including campers and recreational vehicles); and any other building that is regularly occupied, such as a house of worship, community center, or meeting hall, or animal shelter that includes regular human access and occupation. Examples of a non-habitable building include a bus stop shelter, utility building, storage shed, self-storage unit, construction trailer, or an individual shelter for animals such as a doghouse or outdoor kennel.

HARDSHIP – The deprivation resulting from application of the regulations that is so great as to effectively prevent an owner from making any reasonable use of their property. As related to Section 200-277.1 *et seq.*, meaning the exceptional hardship that would result from a failure to grant a requested variance. The Township Planning Board requires that the variance must be exceptional, unusual, and peculiar to the property involved. **Mere economic or financial reason alone is not exceptional. Inconvenience, aesthetic considerations, physical handicaps, personal preferences, or the disapproval of one's neighbors likewise cannot, as a rule, qualify as an exceptional reason. All of these problems can be resolved through other means without granting a variance, even if the alternative is more expensive, or requires the property owner to build elsewhere or put the parcel to a different use than originally intended.**

HIGHEST ADJACENT GRADE – The highest natural elevation of the ground surface prior to construction next to the proposed or existing walls of a structure.

HISTORIC STRUCTURE – Any structure that is:

- a. Listed individually in the National Register of Historic Places (a listing maintained by the Department of Interior) or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register;
- b. Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary to qualify as a registered historic district;
- c. Individually listed on a State inventory of historic places in States with historic preservation programs which have been approved by the Secretary of the Interior; or
- d. Individually listed on a local inventory of historic places in communities with historic preservation programs that have been certified either:
 1. By an approved State program as determined by the Secretary of the Interior; or
 2. Directly by the Secretary of the Interior in States without approved programs.

LAWFULLY EXISTING – Per the FHACA, means an existing fill, structure and/or use, which meets all Federal, State, and local laws, and which is not in violation of the FHACA because it was established:

- a. Prior to January 31, 1980; or
- b. On or after January 31, 1980, in accordance with the requirements of the FHACA as it existed at the time the fill, structure and/or use was established.

Note: Substantially damaged properties and substantially improved properties that have not been elevated are not considered “lawfully existing” for the purposes of the NFIP. This definition is included in this ordinance to clarify the applicability of any more

stringent statewide floodplain management standards required under the FHACA.

LETTER OF MAP AMENDMENT - A Letter of Map Amendment (LOMA) is an official amendment, by letter, to an effective National Flood Insurance Program (NFIP) map that is requested through the Letter of Map Change (LOMC) process. A LOMA establishes a property's location in relation to the Special Flood Hazard Area (SFHA). LOMAs are usually issued because a property has been inadvertently mapped as being in the floodplain but is actually on natural high ground above the base flood elevation. Because a LOMA officially amends the effective NFIP map, it is a public record that the community must maintain. Any LOMA should be noted on the community's master flood map and filed by panel number in an accessible location.

LETTER OF MAP CHANGE – The Letter of Map Change (LOMC) process is a service provided by FEMA for a fee that allows the public to request a change in flood zone designation in an Area of Special Flood Hazard on an Flood Insurance Rate Map (FIRM). Conditional Letters of Map Revision, Conditional Letters of Map Revision – Fill, Letters of Map Revision, Letters of Map Revision-Fill, and Letters of Map Amendment are requested through the Letter of Map Change (LOMC) process.

LETTER OF MAP REVISION - A Letter of Map Revision (LOMR) is FEMA's modification to an effective Flood Insurance Rate Map (FIRM). Letter of Map Revisions are generally based on the implementation of physical measures that affect the hydrologic or hydraulic characteristics of a flooding source and thus result in the modification of the existing regulatory floodway, the effective Base Flood Elevations (BFEs), or the Special Flood Hazard Area (SFHA). The LOMR officially revises the Flood Insurance Rate Map (FIRM) and sometimes the Flood Insurance Study (FIS) report, and when appropriate, includes a description of the modifications. The LOMR is generally accompanied by an annotated copy of the affected portions of the FIRM or FIS report. Because a LOMR officially revises the effective NFIP map, it is a public record that the community must maintain. Any LOMR should be noted on the community's master flood map and filed by panel number in an accessible location.

LETTER OF MAP REVISION – FILL -- A Letter of Map Revision Based on Fill (LOMR-F) is FEMA's modification of the Special Flood Hazard Area (SFHA) shown on the Flood Insurance Rate Map (FIRM) based on the placement of fill outside the existing regulatory floodway may be initiated through the Letter of Map Change (LOMC) Process. Because a LOMR-F officially revises the effective Flood Insurance Rate Map (FIRM) map, it is a public record that the community must maintain. Any LOMR-F should be noted on the community's master flood map and filed by panel number in an accessible location.

LICENSED DESIGN PROFESSIONAL – Licensed design professional shall refer to either a New Jersey Licensed Professional Engineer, licensed by the New Jersey State Board of Professional Engineers and Land Surveyors or a New Jersey Licensed Architect, licensed by the New Jersey State Board of Architects.

LICENSED PROFESSIONAL ENGINEER - A licensed professional engineer shall refer to individuals licensed by the New Jersey State Board of Professional Engineers and Land Surveyors.

LOCAL DESIGN FLOOD ELEVATION (LDFE) – The elevation reflective of the most recent available preliminary flood elevation guidance FEMA has provided as depicted on but not limited to Advisory Flood Hazard Area Maps, Work Maps, or Preliminary FIS and FIRM which is also inclusive of freeboard specified by the New Jersey Flood Hazard Area Control Act and Uniform Construction Codes and any additional freeboard specified in a community's ordinance. In no circumstances shall a project's LDFE be lower than a permit-specified Flood Hazard Area Design Flood Elevation or a valid NJDEP Flood Hazard Area Verification Letter plus the freeboard as required in ASCE 24 and the effective FEMA Base Flood Elevation.

LOWEST ADJACENT GRADE – The lowest point of ground, patio, or sidewalk slab immediately next a structure, except in AO Zones where it is the natural grade elevation.

LOWEST FLOOR – In A Zones, the lowest floor is the top surface of the lowest floor of the lowest enclosed area (including basement). An unfinished or flood resistant enclosure, usable solely for the parking of vehicles, building access or storage in an area other than a basement is not considered a building's lowest floor provided that such enclosure is not built so as to render the structure in violation of other applicable non-elevation design requirements of these regulations.

MANUFACTURED HOME – A structure that is transportable in one or more sections, eight (8) feet or more in width and greater than four hundred (400) square feet, built on a permanent chassis, designed for use with or without a permanent foundation when attached to the required utilities, and constructed to the Federal Manufactured Home Construction and Safety Standards and rules and regulations promulgated by the U.S. Department of Housing and Urban Development. The term also includes mobile homes, park trailers, travel trailers and similar transportable structures that are placed on a site for 180 consecutive days or longer.

MANUFACTURED HOME PARK OR SUBDIVISION – A parcel (or contiguous parcels) of land divided into two or more manufactured home lots for rent or sale.

MARKET VALUE – The price at which a property will change hands between a willing buyer and a willing seller, neither party being under compulsion to buy or sell and both having reasonable knowledge of relevant facts. As used in these regulations, the term refers to the market value of buildings and structures, excluding the land and other improvements on the parcel. Market value shall be determined by one of the following methods (1) Actual Cash Value (replacement cost depreciated for age and quality of construction), (2) tax assessment value adjusted to approximate market value by a factor provided by the Property Appraiser, or (3) established by a qualified independent appraiser.

NEW CONSTRUCTION – Structures for which the start of construction commenced on or after the effective date of the first floodplain regulation adopted by a community; includes any subsequent improvements to such structures. New construction includes work determined to be a substantial improvement.

NON-RESIDENTIAL – Pursuant to ASCE 24, any building or structure or portion thereof that is not classified as residential.

ORDINARY MAINTENANCE AND MINOR WORK – This term refers to types of work that may be excluded from construction permitting under N.J.A.C. 5:23 in the March 5, 2018 New Jersey Register. Some of these types of work must be considered in determinations of substantial improvement and substantial damage in regulated floodplains under 44 CFR 59.1. These types of work include but are not limited to replacements of roofing, siding, interior finishes, kitchen cabinets, plumbing fixtures and piping, HVAC and air conditioning equipment, exhaust fans, built in appliances, electrical wiring, etc. Improvements necessary to correct existing violations of State or local health, sanitation, or code enforcement officials which are the minimum necessary to assure safe living conditions and improvements of historic structures as discussed in 44 CFR 59.1 shall not be included in the determination of ordinary maintenance and minor work.

RECREATIONAL VEHICLE – A vehicle that is built on a single chassis, 400 square feet or less when measured at the largest horizontal projection, designed to be self-propelled or permanently towable by a light-duty truck, and designed primarily not for use as a permanent dwelling but as temporary living quarters for recreational, camping, travel or seasonal use. A recreational vehicle is ready for highway use if it is on its wheels or jacking system, is attached to the site only by quick disconnect type utilities and security devices and has no permanently attached additions.

RESIDENTIAL – Pursuant to the ASCE 24:

- a. Buildings and structures and portions thereof where people live or that are used for sleeping purposes on a transient or non-transient basis;
- b. Structures including but not limited to one- and two-family dwellings, townhouses, condominiums, multi-family dwellings, apartments, congregate residences, boarding houses, lodging houses, rooming houses, hotels, motels, apartment buildings, convents, monasteries, dormitories, fraternity houses, sorority houses, vacation time-share properties; and
- c. institutional facilities where people are cared for or live on a 24-hour basis in a supervised environment, including but not limited to board and care facilities, assisted living facilities, halfway houses, group homes, congregate care facilities, social rehabilitation facilities, alcohol and drug centers, convalescent facilities, hospitals, nursing homes, mental hospitals, detoxification facilities, prisons, jails, reformatories, detention centers, correctional centers, and prerelease centers.

SOLID WASTE DISPOSAL – “Solid Waste Disposal” shall mean the storage, treatment, utilization, processing or final disposition of solid waste as described in N.J.A.C. 7:26-1.6

or the storage of unsecured materials as described in N.J.A.C. 7:13-2.3 for a period of greater than 6 months as specified in N.J.A.C. 7:26 which have been discharged, deposited, injected, dumped, spilled, leaked, or placed into any land or water such that such solid waste may enter the environment or be emitted into the air or discharged into any waters, including groundwaters.

SPECIAL FLOOD HAZARD AREA – The greater of the following: (1) Land in the floodplain within a community subject to a one percent or greater chance of flooding in any given year, shown on the FIRM as Zone A, AO, A1-30, AE, A99, or AH; (2) Land and the space above that land, which lies below the peak water surface elevation of the flood hazard area design flood for a particular water, as determined using the methods set forth in the New Jersey Flood Hazard Area Control Act in N.J.A.C. 7:13; (3) Riparian Buffers as determined in the New Jersey Flood Hazard Area Control Act in N.J.A.C. 7:13. Also referred to as the **AREA OF SPECIAL FLOOD HAZARD**.

START OF CONSTRUCTION – The **Start of Construction is as follows:**

- a. **For other than new construction or substantial improvements, under the Coastal Barrier Resources Act (CBRA)**, this is the date the building permit was issued, provided that the actual start of construction, repair, rehabilitation, addition, placement or other improvement was within 180 days of the permit date. The actual start means either the first placement of permanent construction of a building on site, such as the pouring of a slab or footing, the installation of piles, the construction of columns or any work beyond the stage of excavation; or the placement of a manufactured (mobile) home on a foundation. For a substantial improvement, actual start of construction means the first alteration of any wall, ceiling, floor, or other structural part of a building, whether or not that alteration affects the external dimensions of the building.
- b. For the purposes of determining whether proposed construction must meet new requirements when National Flood Insurance Program (NFIP) maps are issued or revised and Base Flood Elevation's (BFEs) increase or zones change, the Start of Construction includes substantial improvement, and means the date the building permit was issued, provided the actual start of construction, repair, reconstruction, rehabilitation, addition placement, or other improvement was within 180 days of the permit date. The actual start means either the first placement of permanent construction of a structure on a site, such as the pouring of slab or footings, the installation of piles, the construction of columns, or any work beyond the stage of excavation; or the placement of a manufactured home on a foundation.

Permanent construction does not include land preparation, such as clearing, grading, and filling, nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers, or foundations or the erection of temporary forms; nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or not part of the main structure. Such development must also be permitted and must meet new requirements when National Flood Insurance Program (NFIP) maps are issued or

revised and Base Flood Elevation's (BFEs) increase or zones change.

For a substantial improvement, the actual start of construction means the first alteration of any wall, ceiling, floor, or other structural part of a building, whether or not that alteration affects the external dimensions of the building.

For determining if new construction and substantial improvements within the Coastal Barrier Resources System (CBRS) can obtain flood insurance, a different definition applies.

STRUCTURE – A walled and roofed building, a manufactured home, or a gas or liquid storage tank that is principally above ground.

SUBSTANTIAL DAMAGE – Damage of any origin sustained by a structure whereby the cost of restoring the structure to its before damaged condition would equal or exceed 50 percent of the market value of the structure before the damage occurred.

SUBSTANTIAL IMPROVEMENT – Any reconstruction, rehabilitation, addition, or other improvement of a structure taking place, the cost of which equals or exceeds 50 percent of the market value of the structure before the “start of construction” of the improvement. This term includes structures which have incurred “substantial damage”, regardless of the actual repair work performed. The term does not, however, include either:

- a. Any project for improvement of a structure to correct existing violations of State or local health, sanitary or safety code specifications which have been identified by the local code enforcement officer and which are the minimum necessary to assure safe living conditions; or
- b. Any alteration of a "historic structure", provided that the alteration will not preclude the structure's continued designation as a "historic structure."

UTILITY AND MISCELLANEOUS GROUP U BUILDINGS AND STRUCTURES – Buildings and structures of an accessory character and miscellaneous structures not classified in any special occupancy, as described in ASCE 24.

VARIANCE – A grant of relief from the requirements of this Part 6 which permits construction in a manner otherwise prohibited by this section where specific enforcement would result in unnecessary hardship.

VIOLATION – A development that is not fully compliant with these regulations or the flood provisions of the building code. A structure or other development without the elevation certificate, other certifications, or other evidence of compliance required in this ordinance is presumed to be in violation until such time as that documentation is provided.

WATER SURFACE ELEVATION – the height, in relation to the North American

Vertical Datum (NAVD) of 1988, (or other datum, where specified) of floods of various magnitudes and frequencies in the flood plains of coastal or riverine areas.

WATERCOURSE. A river, creek, stream, channel, or other topographic feature in, on, through, or over which water flows at least periodically.

WET FLOODPROOFING – Floodproofing method that relies on the use of flood damage resistant materials and construction techniques in areas of a structure that are below the Local Design Flood Elevation by intentionally allowing them to flood. The application of wet floodproofing as a flood protection technique under the National Flood Insurance Program (NFIP) is limited to enclosures below elevated residential and non-residential structures and to accessory and agricultural structures that have been issued variances by the community.

Article XXXVII Applicability

200-272.1. General. These regulations, in conjunction with the Uniform Construction Code, provide minimum requirements for development located in flood hazard areas, including the subdivision of land and other developments; site improvements and installation of utilities; placement and replacement of manufactured homes; placement of recreational vehicles; new construction and alterations, repair, reconstruction, rehabilitation or additions of existing buildings and structures; substantial improvement of existing buildings and structures, including repair of substantial damage; installation of tanks; temporary structures and temporary or permanent storage; utility and miscellaneous Group U buildings and structures; and certain building work exempt from permit under the Uniform Construction Code; and other buildings and development activities.

200-272.2. Establishment of Flood Hazard Areas. The Township of West Windsor was accepted for participation in the National Flood Insurance Program on May 1, 1984.

The National Flood Insurance Program (NFIP) floodplain management regulations encourage that all Federal, State, and Local regulations that are more stringent than the minimum NFIP standards take precedence in permitting decisions. The FHACA requires that the effective Flood Insurance Rate Map, most recent preliminary FEMA mapping and flood studies, and Department delineations be compared to determine the most restrictive mapping. The FHACA also regulates unstudied flood hazard areas in watersheds measuring 50 acres or greater in size and most riparian zones in New Jersey. Because of these higher standards, the regulated flood hazard area in New Jersey may be more expansive and more restrictive than the FEMA Special Flood Hazard Area. Maps and studies that establish flood hazard areas are on file at the Division of Land Use, Department of Community Development located at #271 Clarksville Road, West Windsor, New Jersey.

The following sources identify flood hazard areas in this jurisdiction and must be considered when determining the Best Available Flood Hazard Data Area:

A. **Effective Flood Insurance Study.** Special Flood Hazard Areas (SFHAs) identified by the Federal Emergency Management Agency in a scientific and engineering report entitled “Flood Insurance Study, Mercer County, New Jersey (All Jurisdictions),” consisting of three volumes each with an effective date of July 20, 2016, and the accompanying Flood Insurance Rate Maps (FIRM) identified in Table 200-272.2(1) whose effective date is July 20, 2016 are hereby adopted by reference.

Table 200-272.2(1)

Map Panel #	Effective Date	Suffix	Map Panel #	Effective Date	Suffix
34021C0133	20-Jul-16	F	34021C0154	20-Jul-16	F
34021C0134	20-Jul-16	F	34021C0161	20-Jul-16	F
34021C0141	20-Jul-16	F	34021C0162	20-Jul-16	F
34021C0142	20-Jul-16	F	34021C0163	20-Jul-16	F
34021C0143	20-Jul-16	F	34021C0164	20-Jul-16	F
34021C0144	20-Jul-16	F	34021C0232	20-Jul-16	F
34021C0153	20-Jul-16	F	34021C0251	20-Jul-16	F

B. **Federal Best Available Information.** Federal Best Available studies issued after the date of this ordinance must also be considered. The Township of West Windsor shall utilize Federal flood information that provides more detailed hazard information, higher flood elevations, larger flood hazard areas, and results in more restrictive regulations. This information may include, but is not limited to, preliminary flood elevation guidance from FEMA (such as Advisory Flood Hazard Area Maps, Work Maps or Preliminary FIS and FIRM). These studies, if and when available, are listed on FEMA’s Map Service Center website. This information shall be used for floodplain regulation purposes only.

C. **Other Best Available Data.** The Township of West Windsor shall utilize high water elevations from flood events, groundwater flooding areas, studies by federal or state agencies, or other information deemed appropriate by the Township of West Windsor. “Other best available information” may not be used which results in less

restrictive flood elevations, design standards, or smaller flood hazard areas than the sources described in Sections 200-272.2.A and 272.2.B, above. This information shall be used for floodplain regulation purposes only.

D. State Regulated Flood Hazard Areas. For State regulated waters, the NJ Department of Environmental Protection (NJDEP) identifies the flood hazard area as the land, and the space above that land, which lies below the “Flood Hazard Area Control Act Design Flood Elevation”, as defined in Section 200-271.2, and as described in the New Jersey Flood Hazard Area Control Act at N.J.A.C. 7:13. A FHACA flood hazard area exists along every regulated water that has a drainage area of 50 acres or greater. Such area may extend beyond the boundaries of the Special Flood Hazard Areas (SFHAs) as identified by FEMA. The following is a list of New Jersey State studied waters in this community under the FHACA, and their respective map identification numbers.

Table 200-272.2(3) List of State Studied Waters

Name of Studied Waters	File Name	Map Number(s)

200-272.3. Establishing the Local Design Flood Elevation (LDFE).

The Local Design Flood Elevation (LDFE) is established in the flood hazard areas determined in Section 200-272.2, above, using the best available flood hazard data sources, and the Flood Hazard Area Control Act minimum Statewide elevation requirements for lowest floors in A zones, ASCE 24 requirements for critical facilities as specified by the building code, plus additional freeboard as specified by this ordinance.

At a minimum, the Local Design Flood Elevation shall be as follows:

- A. For a delineated watercourse, the elevation associated with the Best Available Flood Hazard Data Area determined in Section 200-272.2, above plus one foot or as described by N.J.A.C. 7:13 of freeboard; or
- B. For any undelineated watercourse (where mapping or studies described in 200-272.2.A and 272.2.B above are not available) that has a contributory drainage area of 50 acres or more, the applicants must provide one of the following to determine the Local Design Flood Elevation:
 - (1) A copy of an unexpired NJDEP Flood Hazard Area Verification plus one foot of freeboard and any additional freeboard as required by ASCE 24; or
 - (2) A determination of the Flood Hazard Area Design Flood Elevation using Method 5 or Method 6 (as described in N.J.A.C. 7:13) plus one foot of freeboard and any additional freeboard as required by ASCE 24. Any determination using these methods must be sealed and submitted according to Section 200-275.2. and 200-275.3.
- C. AO Zones – For Zone AO areas on the municipality’s FIRM (or on preliminary

flood elevation guidance from FEMA), the Local Design Flood Elevation is determined from the FIRM panel as the highest adjacent grade plus the depth number specified plus one foot] of freeboard. If no depth number is specified, the Local Design Flood Elevation is three (3) feet above the highest adjacent grade.

- D. Class IV Critical Facilities - For any proposed development of new and substantially improved Flood Design Class IV Critical Facilities, the Local Design Flood Elevation must be the higher of the 0.2% annual chance (500 year) flood elevation or the Flood Hazard Area Design Flood Elevation with an additional 2 feet of freeboard in accordance with ASCE 24.
- E. Class III Critical Facilities - For proposed development of new and substantially improved Flood Design Class III Critical Facilities in coastal high hazard areas, the Local Design Flood Elevation must be the higher of the 0.2% annual chance (500 year) flood elevation or the Flood Hazard Area Design Flood Elevation with an additional 1 foot of freeboard in accordance with ASCE 24.

Article XXXVIII

Duties and Powers of the Floodplain Administrator

200-273.1. Floodplain Administrator Designation. The Zoning Officer is designated the Floodplain Administrator. The Floodplain Administrator shall have the authority to delegate performance of certain duties to other employees.

200-273.2. General. The Floodplain Administrator is authorized and directed to administer the provisions of these regulations. The Floodplain Administrator shall have the authority to render interpretations of these regulations consistent with the intent and purpose of these regulations and to establish policies and procedures in order to clarify the application of its provisions. Such interpretations, policies and procedures shall be consistent with the intent and purpose of these regulations and the flood provisions of the building code and shall not have the effect of waiving specific requirements without the granting of a variance pursuant to Section 200-277.1 *et seq.* of these regulations.

200-273.3. Coordination. The Floodplain Administrator shall coordinate with the Construction Official to administer and enforce the flood provisions of the Uniform Construction Code.

200-273.4. Duties. The duties of the Floodplain Administrator shall include but are not limited to:

- A. Review all permit applications to determine whether proposed development is located in flood hazard areas established in Section 200-272.1 *et seq.* of these regulations.
- B. Require development in flood hazard areas to be reasonably safe from flooding and to be designed and constructed with methods, practices and materials that minimize flood damage.

- C. Interpret flood hazard area boundaries and provide available flood elevation and flood hazard information.
- D. Determine whether additional flood hazard data shall be obtained or developed.
- E. Review required certifications and documentation specified by these regulations and the building code to determine that such certifications and documentations are complete.
- F. Establish, in coordination with the Construction Official, written procedures for administering and documenting determinations of substantial improvement and substantial damage made pursuant to Section 200-273.13 of these regulations.
- G. Coordinate with the Construction Official and others to identify and investigate damaged buildings located in flood hazard areas and inform owners of the requirement to obtain permits for repairs.
- H. Review requests submitted to the Construction Official seeking approval to modify the strict application of the flood load and flood resistant construction requirements of the Uniform Construction code to determine whether such requests require consideration as a variance pursuant to Section 200-277.1 *et seq.* of these regulations.
- I. Require applicants who submit hydrologic and hydraulic engineering analyses to support permit applications to submit to FEMA the data and information necessary to maintain the Flood Insurance Rate Maps when the analyses propose to change base flood elevations, flood hazard area boundaries, or floodway designations; such submissions shall be made within 6 months of such data becoming available.
- J. Require applicants who propose alteration of a watercourse to notify adjacent jurisdictions and the NJDEP Bureau of Flood Engineering, and to submit copies of such notifications to the Federal Emergency Management Agency (FEMA).
- K. Inspect development in accordance with Section 200-276.1 *et seq.* of these regulations and inspect flood hazard areas to determine if development is undertaken without issuance of permits.
- L. Prepare comments and recommendations for consideration when applicants seek variances in accordance with Section 200-277.1 *et seq.* of these regulations.
- M. Cite violations in accordance with Section 200-278.1 *et seq.* of these regulations.
- N. Notify the Federal Emergency Management Agency when the corporate boundaries of Township of West Windsor have been modified.
- O. Permit Ordinary Maintenance and Minor Work in the regulated areas discussed in Section 200-272.2.

200-273.5. Use of changed technical data. The Floodplain Administrator and the applicant shall not use changed flood hazard area boundaries or base flood elevations for proposed buildings or developments unless the Floodplain Administrator or applicant has applied for a Conditional Letter of Map Revision (CLOMR) to the Flood Insurance Rate Map (FIRM) revision and has received the approval of the Federal Emergency

Management Agency. A revision of the effective FIRM does not remove the related feature(s) on a flood hazard area delineation that has been promulgated by the NJDEP. A separate application must be made to the State pursuant to N.J.A.C. 7:13 for revision of a flood hazard design flood elevation, flood hazard area limit, floodway limit, and/or other related feature.

200-273.6. Other permits. Approval of a proposed development shall not be given until the Floodplain Administrator has been provided sufficient proof that necessary permits have been granted by Federal or State agencies having jurisdiction over such development, including section 404 of the Clean Water Act. In the event of conflicting agency permit requirements, the most restrictive floodplain management standards are to be imposed and reflected in the permit approval(s).

200-273.7. Determination of Local Design Flood Elevations. If design flood elevations are not specified, the Floodplain Administrator is authorized to require the applicant to either:

- A. Obtain, review, and reasonably utilize data available from a Federal, State, or other source; OR
- B. Determine the design flood elevation in accordance with accepted hydrologic and hydraulic engineering techniques. Such analyses shall be performed and sealed by a licensed professional engineer. Studies, analyses, and computations shall be submitted in sufficient detail to allow review and approval by the Floodplain Administrator. The accuracy of data submitted for such determination shall be the responsibility of the applicant.

It shall be the responsibility of the Floodplain Administrator to verify that the applicant's proposed Best Available Flood Hazard Data Area and the Local Design Flood Elevation in any development permit accurately applies the best available flood hazard data and methodologies for determining flood hazard areas and design elevations described in Section 200-272.2 and 200-272.3, respectively. This information shall be provided to the Construction Official and documented according to Section 200-273.14.

200-273.8. Requirement to submit new technical data. Base Flood Elevations may increase or decrease resulting from natural changes (e.g. erosion, accretion, channel migration, subsidence, uplift) or man-made physical changes (e.g. dredging, filling, excavation) affecting flooding conditions. As soon as practicable, but not later than six months after the date of a man-made change or when information about a natural change becomes available, the Floodplain Administrator shall notify the Federal Insurance Administrator of the changes by submitting technical or scientific data in accordance with Title 44 Code of Federal Regulations Section 65.3. Such a submission is necessary so that upon confirmation of those physical changes affecting flooding conditions, risk premium rates and floodplain management requirements will be based upon current data.

200-273.9. Activities in riverine flood hazard areas. In riverine flood hazard areas where design flood elevations are specified but floodways have not been designated, the Floodplain Administrator shall not permit any new construction, substantial improvement

or other development, including the placement of fill, unless the applicant submits an engineering analysis prepared by a licensed professional engineer that demonstrates that the cumulative effect of the proposed development, when combined with all other existing and anticipated flood hazard area encroachment, will not increase the design flood elevation more than 0.2 feet at any point within the community.

200-273.10. Floodway encroachment. Prior to issuing a permit for any floodway encroachment, including fill, new construction, substantial improvements and other development or land-disturbing-activity, the Floodplain Administrator shall require submission of a certification prepared by a licensed professional engineer, along with supporting technical data, that demonstrates that such development will not cause any increase in the base flood level.

A. Floodway revisions. A floodway encroachment that increases the level of the base flood is authorized if the applicant has applied for a Conditional Letter of Map Revision (CLOMR) to the Flood Insurance Rate Map (FIRM) and has received the approval of FEMA.

200-273.11. Watercourse alteration. Prior to issuing a permit for any alteration or relocation of any watercourse, the Floodplain Administrator shall require the applicant to provide notification of the proposal to the appropriate authorities of all adjacent government jurisdictions, as well as the NJDEP Bureau of Flood Engineering and the Division of Land Resource Protection. A copy of the notification shall be maintained in the permit records and submitted to FEMA.

A. Engineering analysis. The Floodplain Administrator shall require submission of an engineering analysis prepared by a licensed professional engineer, demonstrating that the flood-carrying capacity of the altered or relocated portion of the watercourse will be maintained, neither increased nor decreased. Such watercourses shall be maintained in a manner that preserves the channel's flood-carrying capacity.

200-273.12. Development in riparian zones All development in Riparian Zones as described in N.J.A.C. 7:13 is prohibited by this ordinance unless the applicant has received an individual or general permit or has complied with the requirements of a permit by rule or permit by certification from NJDEP Division of Land Resource Protection prior to application for a floodplain development permit and the project is compliant with all other Floodplain Development provisions of this ordinance. The width of the riparian zone can range between 50 and 300 feet and is determined by the attributes of the waterbody and designated in the New Jersey Surface Water Quality Standards N.J.A.C. 7:9B. The portion of the riparian zone located outside of a regulated water is measured landward from the top of bank. Applicants can request a verification of the riparian zone limits or a permit applicability determination to determine State permit requirements under N.J.A.C. 7:13 from the NJDEP Division of Land Resource Protection.

200-273.13. Substantial improvement and substantial damage determinations.

When buildings and structures are damaged due to any cause including but not limited to man-made, structural, electrical, mechanical, or natural hazard events, or are determined to be unsafe as described in N.J.A.C. 5:23; and for applications for building permits to improve buildings and structures, including alterations, movement, repair, additions, rehabilitations, renovations, ordinary maintenance and minor work, substantial improvements, repairs of substantial damage, and any other improvement of or work on such buildings and structures, the Floodplain Administrator, in coordination with the Construction Official, shall:

- A. Estimate the market value, or require the applicant to obtain a professional appraisal prepared by a qualified independent appraiser of the market value, of the building or structure before the start of construction of the proposed work. In the case of repair, the market value of the building or structure shall be the market value before the damage occurred and before any repairs are made.
- B. Determine and include the costs of all ordinary maintenance and minor work, as discussed in Section 200-272.2, performed in the floodplain regulated by this ordinance in addition to the costs of those improvements regulated by the Construction Official in substantial damage and substantial improvement calculations.
- C. Compare the cost to perform the improvement, the cost to repair the damaged building to its pre-damaged condition, or the combined costs of improvements and repairs, where applicable, to the market value of the building or structure.
- D. Determine and document whether the proposed work constitutes substantial improvement or repair of substantial damage.
- E. Notify the applicant in writing when it is determined that the work constitutes substantial improvement or repair of substantial damage and that compliance with the flood resistant construction requirements of the building code is required and notify the applicant in writing when it is determined that work does not constitute substantial improvement or repair of substantial damage. The Floodplain Administrator shall also provide all letters documenting substantial damage and compliance with flood resistant construction requirements of the building code to the NJDEP Bureau of Flood Engineering.

200-273.14. Department records. In addition to the requirements of the building code and these regulations, and regardless of any limitation on the period required for retention of public records, the Floodplain Administrator shall maintain, preserve and make available for public inspection such records as are necessary for the administration of these regulations and the flood provisions of the Uniform Construction Code, including Flood Insurance Studies, Flood Insurance Rate Maps; documents from FEMA that amend or revise FIRMs; NJDEP delineations, records of issuance of permits and denial of permits; records of ordinary maintenance and minor work, determinations of whether proposed work constitutes substantial improvement or repair of substantial damage; required certifications and documentation specified by the Uniform Construction Code and these regulations including as-built Elevation Certificates; notifications to adjacent communities, FEMA, and the State related to alterations of watercourses; assurance that

the flood carrying capacity of altered waterways will be maintained; documentation related to variances, including justification for issuance or denial; and records of enforcement actions taken pursuant to these regulations and the flood resistant provisions of the Uniform Construction Code. The Floodplain Administrator shall also record the required elevation, determination method, and base flood elevation source used to determine the Local Design Flood Elevation in the floodplain development permit.

200-273.15. Liability. The Floodplain Administrator and any employee charged with the enforcement of these regulations, while acting for the jurisdiction in good faith and without malice in the discharge of the duties required by these regulations or other pertinent law or ordinance, shall not thereby be rendered liable personally and is hereby relieved from personal liability for any damage accruing to persons or property as a result of any act or by reason of an act or omission in the discharge of official duties. Any suit instituted against an officer or employee because of an act performed by that officer or employee in the lawful discharge of duties and under the provisions of these regulations shall be defended by legal representative of the jurisdiction until the final termination of the proceedings. The Floodplain Administrator and any subordinate shall not be liable for cost in any action, suit or proceeding that is instituted in pursuance of the provisions of these regulations.

Article XXXIX Permits

200-274.1. Permits Required. Any person, owner or authorized agent who intends to conduct any development in a flood hazard area shall first make application to the Floodplain Administrator and shall obtain the required permit. Depending on the nature and extent of proposed development that includes a building or structure, the Floodplain Administrator may determine that a floodplain development permit or approval is required in addition to a building permit.

200-274.2. Application for permit. The applicant shall file an application in writing on a form furnished by the Floodplain Administrator. Such application shall:

- A. Identify and describe the development to be covered by the permit.
- B. Describe the land on which the proposed development is to be conducted by legal description, street address or similar description that will readily identify and definitively locate the site.
- C. Indicate the use and occupancy for which the proposed development is intended.
- D. Be accompanied by a site plan and construction documents as specified in Section 200-275.1 *et seq.* of these regulations, grading and filling plans and other information deemed appropriate by the Floodplain Administrator.
- E. State the valuation of the proposed work, including the valuation of ordinary maintenance and minor work.
- F. Be signed by the applicant or the applicant's authorized agent.

200-274.3. Validity of permit. The issuance of a permit under these regulations or the Uniform Construction Code shall not be construed to be a permit for, or approval of, any violation of this appendix or any other ordinance of the jurisdiction. The issuance of a permit based on submitted documents and information shall not prevent the Floodplain Administrator from requiring the correction of errors. The Floodplain Administrator is authorized to prevent occupancy or use of a structure or site which is in violation of these regulations or other ordinances of this jurisdiction.

200-274.4. Expiration. A permit shall become invalid when the proposed development is not commenced within 180 days after permit issuance, or when the work authorized is suspended or abandoned for a period of 180 days after the work commences. Extensions shall be requested in writing and justifiable cause demonstrated. The Floodplain Administrator is authorized to grant, in writing, one or more extensions of time, for periods not more than 180 days each.

200-274.5. Suspension or revocation. The Floodplain Administrator is authorized to suspend or revoke a permit issued under these regulations wherever the permit is issued in error or on the basis of incorrect, inaccurate or incomplete information, or in violation of any ordinance or code of this jurisdiction.

Article XL

Required Information for Development in a Flood Hazard Area

200-275.1. Information for development in flood hazard areas. The site plan or construction documents for any development subject to the requirements of these regulations shall be drawn to scale and shall include, as applicable to the proposed development:

- A. Delineation of flood hazard areas, floodway boundaries and flood zone(s), base flood elevation(s), and ground elevations when necessary for review of the proposed development. For buildings that are located in more than one flood hazard area, the elevation and provisions associated with the most restrictive flood hazard area shall apply.
- B. Where base flood elevations or floodway data are not included on the FIRM or in the Flood Insurance Study, they shall be established in accordance with Section 200-275.2.
- C. Where the parcel on which the proposed development will take place will have more than 50 lots or is larger than 5 acres and base flood elevations are not included on the FIRM or in the Flood Insurance Study, such elevations shall be established in accordance with Section 200-275.2.C of these regulations.
- D. Location of the proposed activity and proposed structures, and locations of existing buildings and structures.
- E. Location, extent, amount, and proposed final grades of any filling, grading, or excavation.
- F. Where the placement of fill is proposed, the amount, type, and source of fill

material; compaction specifications; a description of the intended purpose of the fill areas; and evidence that the proposed fill areas are the minimum necessary to achieve the intended purpose. The applicant shall provide an engineering certification confirming that the proposal meets the flood storage displacement limitations of N.J.A.C. 7:13.

- G. Existing and proposed alignment of any proposed alteration of a watercourse.
- H. Floodproofing certifications, Operations and Maintenance Plans, Warning and Evacuation Plans and other documentation required pursuant to FEMA publications.

The Floodplain Administrator is authorized to waive the submission of site plans, construction documents, and other data that are required by these regulations, excluding those items that are required to be prepared by a registered design professional, when it is found that the nature of the proposed development is such that the review of such submissions is not necessary to ascertain compliance.

200-275.2. Information for development in flood hazard areas without base flood elevations (approximate Zone A). Where flood hazard areas are delineated on the effective or preliminary FIRM and base flood elevation data have not been provided, the applicant shall consult with the Floodplain Administrator to determine whether to:

- A. Use the Approximation Method (Method 5) described in N.J.A.C. 7:13 in conjunction with Appendix 1 of the FHACA to determine the required flood elevation.
- B. Obtain, review, and reasonably utilize data available from a Federal, State or other source when those data are deemed acceptable to the Floodplain Administrator to reasonably reflect flooding conditions.
- C. Determine the base flood elevation in accordance with accepted hydrologic and hydraulic engineering techniques according to Method 6 as described in N.J.A.C. 7:13. Such analyses shall be performed and sealed by a licensed professional engineer.

Studies, analyses, and computations shall be submitted in sufficient detail to allow review and approval by the Floodplain Administrator prior to floodplain development permit issuance. The accuracy of data submitted for such determination shall be the responsibility of the applicant. Where the data are to be used to support a Letter of Map Change (LOMC) from FEMA, the applicant shall be responsible for satisfying the submittal requirements and pay the processing fees.

200-275.3. Analyses and certifications by a Licensed Professional Engineer. As applicable to the location and nature of the proposed development activity, and in addition to the requirements of this section, the applicant shall have the following analyses signed and sealed by a licensed professional engineer for submission with the site plan and construction documents:

- A. For development activities proposed to be located in a regulatory floodway, a

floodway encroachment analysis that demonstrates that the encroachment of the proposed development will not cause any increase in base flood elevations; where the applicant proposes to undertake development activities that do increase base flood elevations, the applicant shall submit such analysis to FEMA as specified in Section 200-275.4 of these regulations and shall submit the Conditional Letter of Map Revision, if issued by FEMA, with the site plan and construction documents.

- B. For development activities proposed to be located in a riverine flood hazard area where base flood elevations are included in the FIS or FIRM but floodways have not been designated, hydrologic and hydraulic analyses that demonstrate that the cumulative effect of the proposed development, when combined with all other existing and anticipated flood hazard area encroachments will not increase the base flood elevation more than 0.2 feet at any point within the jurisdiction. This requirement does not apply in isolated flood hazard areas not connected to a riverine flood hazard area or in flood hazard areas identified as Zone AO or Zone AH.
- C. For alteration of a watercourse, an engineering analysis prepared in accordance with standard engineering practices which demonstrates that the flood-carrying capacity of the altered or relocated portion of the watercourse will not be decreased, and certification that the altered watercourse shall be maintained, neither increasing nor decreasing the channel's flood-carrying capacity. The applicant shall submit the analysis to FEMA as specified in Section 200-275.4 of these regulations. The applicant shall notify the chief executive officer of all affected adjacent jurisdictions, the NJDEP's Bureau of Flood Engineering and the Division of Land Resource Protection; and shall provide documentation of such notifications.
- D. For analyses performed using Methods 5 and 6 (as described in N.J.A.C. 7:13) in flood hazard zones without base flood elevations (approximate A zones).

200-275.4. Submission of additional data. When additional hydrologic, hydraulic or other engineering data, studies, and additional analyses are submitted to support an application, the applicant has the right to seek a Letter of Map Change (LOMC) from FEMA to change the base flood elevations, change floodway boundaries, or change boundaries of flood hazard areas shown on FIRMs, and to submit such data to FEMA for such purposes. The analyses shall be prepared by a licensed professional engineer in a format required by FEMA. Submittal requirements and processing fees shall be the responsibility of the applicant.

Article XLI Inspections

200-276.1. General. Development for which a permit is required shall be subject to inspection. Approval as a result of an inspection shall not be construed to be an approval of a violation of the provisions of these regulations or the building code. Inspections presuming to give authority to violate or cancel the provisions of these regulations or the building code or other ordinances shall not be valid.

200-276.2. Inspections of development. The Floodplain Administrator shall inspect all development in flood hazard areas authorized by issuance of permits under these regulations. The Floodplain Administrator shall inspect flood hazard areas from time to time to determine if development is undertaken without issuance of a permit.

200-276.3. Buildings and structures. The Construction Official shall make or cause to be made, inspections for buildings and structures in flood hazard areas authorized by permit in accordance with the Uniform Construction Code, N.J.A.C. 5:23.

- A. **Lowest floor elevation.** Upon placement of the lowest floor, including the basement, and prior to further vertical construction, certification of the elevation required in Section 200-280.2 shall be submitted to the Construction Official on an Elevation Certificate.
- B. **Installation of attendant utilities** (electrical, heating, ventilating, air-conditioning, and other service equipment) and sanitary facilities elevated as discussed in Section 200-280.2.
- C. **Final inspection.** Prior to the final inspection, certification of the elevation required in Section 200-280.2 shall be submitted to the Construction Official on an Elevation Certificate.

200-276.4. Manufactured homes. Per the requirements of Section 200-280.4 the Floodplain Administrator shall inspect manufactured homes that are installed or replaced in flood hazard areas to determine compliance with the requirements of these regulations and the conditions of the issued permit. Upon placement of a manufactured home, certification of the elevation of the lowest floor shall be submitted on an Elevation Certificate to the Floodplain Administrator prior to the final inspection.

Article XLII Variances

200-277.1. General. The Township Planning Board shall hear and decide requests for variances. The Township Planning Board shall base its determination on technical justifications submitted by applicants, the considerations for issuance in Section 200-277.5, the conditions of issuance set forth in Section 200-277.6, and the comments and recommendations of the Floodplain Administrator and, as applicable, the Township Engineer and/or the Construction Official. The Township Planning Board has the right to attach such conditions to variances as it deems necessary to further the purposes and objectives of these regulations.

200-277.2. Historic structures. A variance to the substantial improvement requirements of this ordinance is authorized provided that the repair or rehabilitation of a historic structure is completed according to N.J.A.C. 5:23-6.33, Section 1612 of the International Building Code and R322 of the International Residential Code, the repair or

rehabilitation will not preclude the structure's continued designation as a historic structure, the structure meets the definition of the historic structure as described by this ordinance, and the variance is the minimum necessary to preserve the historic character and design of the structure.

200-277.3. Functionally dependent uses. A variance is authorized to be issued for the construction or substantial improvement necessary for the conduct of a functionally dependent use provided the variance is the minimum necessary to allow the construction or substantial improvement, and that all due consideration has been given to use of methods and materials that minimize flood damage during the base flood and create no additional threats to public safety.

200-277.4. Restrictions in floodways. A variance shall not be issued for any proposed development in a floodway when any increase in flood levels would result during the base flood discharge, as evidenced by the applicable analysis and certification required in Section 200-275.3.A of these regulations.

200-277.5. Considerations. In reviewing requests for variances, all technical evaluations, all relevant factors, all other portions of these regulations, and the following shall be considered:

- A. The danger that materials and debris may be swept onto other lands resulting in further injury or damage.
- B. The danger to life and property due to flooding or erosion damage.
- C. The susceptibility of the proposed development, including contents, to flood damage and the effect of such damage on current and future owners.
- D. The importance of the services provided by the proposed development to the community.
- E. The availability of alternate locations for the proposed development that are not subject to flooding or erosion and the necessity of a waterfront location, where applicable.
- F. The compatibility of the proposed development with existing and anticipated development.
- G. The relationship of the proposed development to the comprehensive plan and floodplain management program for that area.
- H. The safety of access to the property in times of flood for ordinary and emergency vehicles.
- I. The expected heights, velocity, duration, rate of rise and debris and sediment transport of the floodwater and the effects of wave action, where applicable, expected at the site.
- J. The costs of providing governmental services during and after flood conditions including maintenance and repair of public utilities and facilities such as sewer, gas, electrical and water systems, streets, and bridges.

200-277.6. Conditions for issuance. Variances shall only be issued upon:

- A. Submission by the applicant of a showing of good and sufficient cause that the unique characteristics of the size, configuration or topography of the site limit compliance with any provision of these regulations or renders the elevation standards of the building code inappropriate.
- B. A determination that failure to grant the variance would result in exceptional hardship due to the physical characteristics of the land that render the lot undevelopable.
- C. A determination that the granting of a variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, nor create nuisances, cause fraud on or victimization of the public or conflict with existing local laws or ordinances.
- D. A determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.
- E. Notification to the applicant in writing over the signature of the Floodplain Administrator that the issuance of a variance to construct a structure below the base flood level will result in increased premium rates for flood insurance (up to amounts as high as \$25 for each \$100 of insurance coverage) and that such construction below the base flood level increases risks to life and property.

Article XLIII Violations

200-278.1. Violations. Any development in any flood hazard area that is being performed without an issued permit or that is in conflict with an issued permit shall be deemed a violation. A building or structure without the documentation of elevation of the lowest floor, other required design certifications, or other evidence of compliance required by the building code is presumed to be a violation until such time as that documentation is provided.

200-278.2. Authority. The Floodplain Administrator is authorized to serve notices of violation or stop work orders to owners of property involved, to the owner's agent, or to the person or persons doing the work for development that is not within the scope of the Uniform Construction Code, but is regulated by these regulations and that is determined to be a violation.

200-278.3. Unlawful continuance. Any person who shall continue any work after having been served with a notice of violation or a stop work order, except such work as that person is directed to perform to remove or remedy a violation or unsafe condition, shall be subject to penalties as prescribed by N.J.S.A. 40:49-5 as appropriate.

200-278.4. Review Period to Correct Violations. A 30-day period shall be given to the property owner as an opportunity to cure or abate the condition. The property owner

shall also be afforded an opportunity for a hearing before the court for an independent determination concerning the violation. Subsequent to the expiration of the 30-day period, penalties as outlined in Section 200-270.8 may be imposed if a court has not determined otherwise, or if upon reinspection of the property, it is determined that the abatement has not been substantially completed.

Article XLIV

Requirements for Subdivisions and Land Developments

200-279.1. General. Any subdivision proposal, including proposals for manufactured home parks and subdivisions, or other proposed new development in a flood hazard area shall be reviewed to assure that:

- A. All such proposals are consistent with the need to minimize flood damage.
- B. All public utilities and facilities, such as sewer, gas, electric and water systems are located and constructed to minimize or eliminate flood damage.
- C. Adequate drainage is provided to reduce exposure to flood hazards; in Zones AH and AO, adequate drainage paths shall be provided to guide floodwater around and away from structures.

200-279.2. Subdivision requirements. Where any portion of proposed subdivisions, including manufactured home parks and subdivisions, lies within a flood hazard area, the following shall be required:

- A. The flood hazard area, including floodways, coastal high hazard areas, and Coastal A Zones, and base flood elevations, as appropriate, shall be delineated on tentative subdivision plats.
- B. Residential building lots shall be provided with adequate buildable area outside the floodway.
- C. The design criteria for utilities and facilities set forth in these regulations and appropriate codes shall be met.

200-279.3. Encroachment in floodways. Development, land disturbance activities, and encroachments in floodways shall not be authorized unless it has been demonstrated through hydrologic and hydraulic analyses required in accordance with Section 200-275.3.A of these regulations, that the proposed encroachment will not result in any increase in the base flood level during occurrence of the base flood discharge. If Section 200-275.3.A is satisfied, proposed elevation, addition, or reconstruction of a lawfully existing structure within a floodway shall also be in accordance with Section 200-280.2 of this ordinance and the floodway requirements of N.J.A.C. 7:13.

A. Prohibited in floodways. The following are prohibited activities:

- (1) The storage of unsecured materials is prohibited within a floodway pursuant to N.J.A.C. 7:13.
- (2) Fill and new structures are prohibited in floodways per N.J.A.C. 7:13.

200-279.4. Sewer facilities. All new and replaced sanitary sewer facilities, private sewage treatment plants (including all pumping stations and collector systems) and on-site waste disposal systems shall be designed in accordance with the New Jersey septic system regulations contained in N.J.A.C. 14A and N.J.A.C. 7:9A, the UCC Plumbing Subcode (N.J.A.C. 5:23) and Chapter 7, ASCE 24, to minimize or eliminate infiltration of floodwater into the facilities and discharge from the facilities into flood waters, or impairment of the facilities and systems.

200-279.5. Water facilities. All new and replacement water facilities shall be designed in accordance with the New Jersey Safe Drinking Water Act (N.J.A.C. 7:10) and the provisions of Chapter 7 ASCE 24, to minimize or eliminate infiltration of floodwater into the systems.

200-279.6. Storm drainage. Stormwater collection systems shall be designed to convey the flow of surface waters to minimize or eliminate damage to persons or property.

200-279.7. Railroads, roads, parking areas and associated watercourse crossings.

- A. For any railroad, roadway, or parking area proposed in a flood hazard area, the travel surface shall be constructed at least one foot above the Flood Hazard Area Design Elevation in accordance with N.J.A.C. 7:13.
- B. Roadway and other watercourse crossings that encroach into regulated floodways or riverine waterways with base flood elevations where floodways have not been designated, including roads, bridges, culverts, low- water crossings and similar means for vehicles or pedestrians to travel from one side of a watercourse to the other side, shall meet the requirements of Section 200-275.3.A of these regulations.

200-279.8. Limitations on placement of fill. Subject to the limitations of these regulations, fill shall be designed to be stable under conditions of flooding including rapid rise and rapid drawdown of floodwater, prolonged inundation, and protection against flood-related erosion and scour. In addition to these requirements, when intended to support buildings and structures (Zone A only), fill shall comply with the requirements of the UCC (N.J.A.C. 5:23). Proposed fill and encroachments in flood hazard areas shall comply with the flood storage displacement limitations of N.J.A.C. 7:13.

200-279.9. Hazardous Materials. The placement or storage of any containers holding hazardous substances in a flood hazard area is prohibited unless the provisions of N.J.A.C. 7:13 which cover the placement of hazardous substances and solid waste is met.

200-279.10. Recreational Vehicles: Placement of recreational vehicles in a flood hazard area shall be subject to the following restrictions:

- A. Placement prohibited.** The placement of recreational vehicles shall not be authorized in floodways.

B. Temporary placement. Recreational vehicles in flood hazard areas shall be fully licensed, operable and ready for highway use, and shall be placed on a site for less than 180 consecutive days.

C. Permanent placement. Recreational vehicles that are not fully licensed and ready for highway use, or that are to be placed on a site for more than 180 consecutive days, shall meet the requirements of Section 200-280.2 for habitable buildings and Section 200-280.4.B.

200-279.11. Tanks. Underground and above-ground tanks shall be designed, constructed, installed, and anchored in accordance with ASCE 24 and N.J.A.C. 7:13.

200-279.12. Retaining walls, sidewalks, and driveways. Retaining walls, sidewalks and driveways that involve placement of fill in floodways shall meet the requirements of Section 200-275.3.A of these regulations and N.J.A.C. 7:13.

200-279.13. Swimming pools. Swimming pools shall be designed and constructed in accordance with the Uniform Construction Code. Above-ground swimming pools and below-ground swimming pools that involve placement of fill in floodways shall also meet the requirements of Section 200-275.3.A of these regulations. Above-ground swimming pools are prohibited in floodways by N.J.A.C. 7:13.

200-279.14. Fences. Fences in floodways that have the potential to block the passage of floodwater, such as stockade fences and wire mesh fences, shall meet the requirements of Section 200-275.3.A of these regulations. Pursuant to N.J.A.C. 7:13, any fence located in a floodway shall have sufficiently large openings so as not to catch debris during a flood and thereby obstruct floodwaters, such as barbed-wire, split-rail, or strand fence. A fence with little or no open area, such as a chain link, lattice, or picket fence, does not meet this requirement. Foundations for fences greater than 6 feet in height must conform with the Uniform Construction Code. Fences for pool enclosures having openings not in conformance with this section but in conformance with the Uniform Construction Code to limit climbing require a variance as described in Section 200-277.1 et seq. of this ordinance.

Article XLV

Habitable Structures and Other Buildings

200-280.1 General requirements for habitable structures and other buildings. All development and building work, including man-made changes to improved or unimproved real estate for which specific provisions are not specified in these regulations or the Uniform Construction Code (N.J.A.C. 5:23), shall meet the following requirements:

- A. Be located and constructed to minimize flood damage;
- B. Meet the limitations of Section 200-275.3.A of this ordinance when located in a regulated floodway;
- C. Be anchored to prevent flotation, collapse or lateral movement resulting from

hydrostatic and hydrodynamic loads, including the effects of buoyancy, during the conditions of flooding up to the Local Design Flood Elevation determined according to Section 200-272.3;

- D. Be constructed of flood damage-resistant materials as described in ASCE 24 Chapter 5;
- E. Have mechanical, plumbing, and electrical systems above the Local Design Flood Elevation determined according to Section 200-272.3 or meet the requirements of ASCE 24 Chapter 7 which requires that attendant utilities are located above the Local Design Flood Elevation unless the attendant utilities and equipment are:
 - (1) Specifically allowed below the Local Design Flood Elevation; and
 - (2) Designed, constructed, and installed to prevent floodwaters, including any backflow through the system from entering or accumulating within the components.
- F. Not exceed the flood storage displacement limitations in fluvial flood hazard areas in accordance with N.J.A.C. 7:13; and
- G. Not exceed the impacts to frequency or depth of offsite flooding as required by N.J.A.C. 7:13 in floodways.

200-280.2 Requirements for Habitable Buildings and Structures. Construction and Elevation in A Zones:

- A. All new construction and substantial improvement of any habitable building (as defined in Section 200-271.2) located in flood hazard areas shall have the lowest floor, including basement, together with the attendant utilities (including all electrical, heating, ventilating, air-conditioning and other service equipment) and sanitary facilities, elevated to or above the Local Design Flood Elevation as determined in Section 200-272.3, be in conformance with ASCE Chapter 7, and be confirmed by an Elevation Certificate.
- B. All new construction and substantial improvements of non-residential structures shall:
 - (1) Have the lowest floor, including basement, together with the attendant utilities (including all electrical, heating, ventilating, air-conditioning and other service equipment) and sanitary facilities, elevated to or above the Local Design Flood Elevation as determined in Section 200-272.3, be in conformance with ASCE Chapter 7, and be confirmed by an Elevation Certificate;
 - OR
 - (2) Together with the attendant utility and sanitary facilities, be designed so that below the Local Design Flood Elevation, the structure:
 - (a) Meets the requirements of ASCE 24 Chapters 2 and 7; and
 - (b) Is constructed according to the design plans and specifications provided

at permit application and signed by a licensed design professional, is certified by that individual in a Floodproofing Certificate, and is confirmed by an Elevation Certificate.

C. All new construction and substantial improvements with fully enclosed areas below the lowest floor shall be used solely for parking of vehicles, building access, or storage in an area other than a basement and which are subject to flooding. Enclosures shall:

- (1) For habitable structures, be situated at or above the adjoining exterior grade along at least one entire exterior wall, in order to provide positive drainage of the enclosed area in accordance with N.J.A.C. 7:13; enclosures (including crawlspaces and basements) which are below grade on all sides are prohibited;
- (2) Be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwaters unless the structure is non-residential and the requirements of Section 200-280.2B(2) are met;
- (3) Be constructed to meet the requirements of ASCE 24 Chapter 2;
- (4) Have openings documented on an Elevation Certificate; and
- (5) Have documentation that a deed restriction has been obtained for the lot if the enclosure is greater than six feet in height. This deed restriction shall be recorded in the Office of the County Clerk or the Registrar of Deeds and Mortgages in which the building is located, shall conform to the requirements in N.J.A.C.7:13, and shall be recorded within 90 days of receiving a Flood Hazard Area Control Act permit or prior to the start of any site disturbance (including pre-construction earth movement, removal of vegetation and structures, or construction of the project), whichever is sooner. Deed restrictions must explain and disclose that:
 - (a) The enclosure is likely to be inundated by floodwaters which may result in damage and/or inconvenience;
 - (b) The depth of flooding that the enclosure would experience to the Flood Hazard Area Design Flood Elevation; and
 - (c) The deed restriction prohibits habitation of the enclosure and explains that converting the enclosure into a habitable area may subject the property owner to enforcement;

200-280.3 Garages and accessory storage structures. Garages and accessory storage structures shall be designed and constructed in accordance with the Uniform Construction Code.

200-280.4 Manufactured Homes. All manufactured homes installed in flood hazard areas shall be installed pursuant to the Nationally Preemptive Manufactured Home Construction and Safety Standards Program (24 CFR 3280) and shall comply with the following requirements:

- A. **Elevation.** All new, relocated, and replacement manufactured homes to be placed or substantially improved in a flood hazard area shall be elevated such that the bottom of the frame is elevated to or above the elevation specified in Section 200-280.2.
- B. **Foundations.** All new, relocated, and replacement manufactured homes, including substantial improvement of existing manufactured homes, shall be placed on foundations as specified by the manufacturer only if the manufacturer's installation instructions specify that the home has been designed for flood-resistant considerations and provides the conditions of applicability for velocities, depths, or wave action as required by 24 CFR Part 3285-302. The Floodplain Administrator is authorized to determine whether the design meets or exceeds the performance necessary based upon the proposed site location conditions as a precondition of issuing a flood damage prevention permit. If the Floodplain Administrator determines that the home's performance standards will not withstand the flood loads in the proposed location, the applicant must propose a design certified by a New Jersey licensed design professional and in accordance with 24 CFR 3285.301 (c) and (d) which conforms with ASCE 24, the accepted standard of engineering practice for flood resistant design and construction.
- C. **Anchoring.** All new, relocated, and replacement manufactured homes to be placed or substantially improved in a flood hazard area shall be installed using methods and practices which minimize flood damage and shall be securely anchored to an adequately anchored foundation system to resist flotation, collapse and lateral movement. This requirement is in addition to applicable State and local anchoring requirements for resisting wind forces.
- D. **Enclosures.** Fully enclosed areas below elevated manufactured homes shall comply with the requirements of Section 200-280.2.
- E. **Protection of mechanical equipment and outside appliances.** Mechanical equipment and outside appliances shall be elevated to or above the elevation of the bottom of the frame required in Section 200-280.2 of these regulations. An exception shall be where such equipment and appliances are designed and installed to prevent water from entering or accumulating within their components and the systems are constructed to resist hydrostatic and hydrodynamic loads and stresses, including the effects of buoyancy, during the occurrence of flooding up to the elevation required by Section 200-280.2, the systems and equipment shall be permitted to be located below that elevation. Electrical wiring systems shall be permitted below the design flood elevation provided they conform to the provisions of NFPA 70 (National Electric Code).

200-280.5 Utility and Miscellaneous Group U. In accordance with Section 312 of the International Building Code, Utility and Miscellaneous Group U includes buildings and structures that are accessory in character and miscellaneous structures not classified in any specific occupancy in the Building Code, including, but not limited to, agricultural buildings, aircraft hangars (accessory to a one- or two-family residence), barns, carports, communication equipment structures (gross floor area less than 1,500 sq. ft.), fences more than 6 feet (1829 mm) high, grain silos (accessory to a residential occupancy), livestock

shelters, private garages, retaining walls, sheds, stables, tanks and towers.

- A. **Flood loads.** Utility and miscellaneous Group U buildings and structures, including substantial improvement of such buildings and structures, shall be anchored to prevent flotation, collapse or lateral movement resulting from flood loads, including the effects of buoyancy, during conditions up to the Local Design Flood Elevation as determined in Section 200-272.3.
- B. **Elevation.** Utility and miscellaneous Group U buildings and structures, including substantial improvement of such buildings and structures, shall be elevated such that the lowest floor, including basement, is elevated to or above the Local Design Flood Elevation as determined in Section 200-272.3 and in accordance with ASCE 24. Utility lines shall be designed and elevated in accordance with N.J.A.C. 7:13.
- C. **Enclosures below base flood elevation.** Fully enclosed areas below the design flood elevation shall be constructed in accordance with Section 200-280.2 and with ASCE 24 for new construction and substantial improvements. Existing enclosures such as a basement or crawlspace having a floor that is below grade along all adjoining exterior walls shall be abandoned, filled-in, and/or otherwise modified to conform with the requirements of N.J.A.C. 7:13 when the project has been determined to be a substantial improvement by the Floodplain Administrator.
- D. **Flood-damage resistant materials.** Flood-damage-resistant materials shall be used below the Local Design Flood Elevation determined in Section 200-272.3.
- E. **Protection of mechanical, plumbing, and electrical systems.** Mechanical, plumbing, and electrical systems, equipment and components, heating, ventilation, air conditioning, plumbing fixtures, duct systems, and other service equipment, shall be elevated to or above the Local Design Flood Elevation determined in Section 200-272.3. Exception: Electrical systems, equipment and components, and heating, ventilating, air conditioning, and plumbing appliances, plumbing fixtures, duct systems, and other service equipment shall be permitted to be located below the Local Design Flood Elevation provided that they are designed and installed to prevent water from entering or accumulating within the components and to resist hydrostatic and hydrodynamic loads and stresses, including the effects of buoyancy, during the occurrence of flooding to the Local Design Flood Elevation in compliance with the flood-resistant construction requirements of ASCE 24. Electrical wiring systems shall be permitted to be located below the Local Design Flood Elevation provided they conform to the provisions of NFPA 70 (National Electric Code).

Article XLVI

Temporary Structures and Temporary Storage

200-281.1 Temporary structures. Temporary structures shall be erected for a period of less than 180 days. Temporary structures shall be anchored to prevent flotation, collapse or lateral movement resulting from hydrostatic loads, including the effects of

buoyancy, during conditions of the base flood. Fully enclosed temporary structures shall have flood openings that are in accordance with ASCE 24 to allow for the automatic entry and exit of flood waters. Temporary structures in floodways require a permit pursuant to Section 200-274.1 *et seq.* and shall meet the requirements of Section 200-275.3.A of these regulations.

200-281.2 Temporary storage. Temporary storage includes storage of goods and materials for a period of less than 180 days. Stored materials shall not include hazardous materials. Temporary storage in floodways requires a prior written notice to the Floodplain Administrator specifying the start and end dates of the temporary storage, and said storage shall meet the requirements of Section 200-275.3.A of these regulations.

Section 3. Chapter 200 of the Code of the Township of West Windsor (1999), Land Use, Part 1, Site Plan Review, Article VI, Design Details is amended to read as follows. Language in brackets and struck through [~~struck through~~] is being deleted and in **bold and underlined** is being added:

200-34 Environmental considerations.

In addition to conforming to the EIS standards, as set forth herein, the site plan shall be designed in accordance with applicable Township ordinances designed to protect the environment. These include, but are not limited to, Chapter 143, Soil Removal; Part 6, [~~Flood Damage and Prevention~~] **Floodplain Management Regulations**, of this chapter; and Chapter 170, Trees.

Section 4. Chapter 200 of the Code of the Township of West Windsor (1999), Land Use, Part 2, Subdivision, Article XII, Design Standards for Subdivisions is amended to read as follows. Language in brackets and struck through [~~struck through~~] is being deleted and in **bold and underlined** is being added:

200-62 Structure location and driveway.

A. All lots shall be such that a structure conforming to the intended use and setback requirements of Part 4, Zoning, of this chapter, can be constructed in an area of the lot that is in conformity with the provisions of Part 4, Zoning, or Part 6, [~~Flood Damage and Prevention~~] **Floodplain Management Regulations**, of this chapter.

B. Any structure must be accessible by means of a driveway that complies with the provisions of Article VI, § 200-29, of Part 1 of this chapter. Driveways shall be so laid out that it is possible to turn all vehicles on the lot and that it is not necessary to back any vehicle into a street.

Section 5. Chapter 200 of the Code of the Township of West Windsor (1999), Land Use, Part 4, Zoning, Article XXVI, Titles, Purposes, Establishment of Districts; General Conditions is amended to read as follows. Language in brackets and struck through [~~struck through~~] is being deleted and in **bold and underlined** is being added:

200-149 Riparian zones; steep slopes; building prohibition along watercourses and floodplains.

Any use or building to be erected, moved, altered, rebuilt or enlarged adjacent to watercourses or located within flood-prone areas shall also conform to the conditions and standards contained in Part 6 of this chapter, [~~Flood Damage and Prevention~~] **Floodplain Management Regulations**.

The following riparian zones and regulations herein are enacted to protect the streams, lakes, and other surface water bodies of the Township of West Windsor, and to comply with N.J.A.C. 7:15-5.25(g)3, which requires municipalities to adopt an ordinance that prevents new disturbance associated with projects or activities in riparian zones as described herein. Compliance with the riparian zone requirements herein does not constitute compliance with the riparian zone of buffer requirements imposed under any other federal, state or local statute, regulation or ordinance.

The following steep slopes regulations herein are enacted to restrict or control the intensity of use in areas of steeply sloping terrain in order to limit soil loss, soil erosion, excessive stormwater runoff, the degradation of surface water and to maintain the natural topography and drainage patterns of the land.

Section 6. Chapter 200 of the Code of the Township of West Windsor (1999), Land Use, Part 4, Zoning, Article XXXI, General Provisions and Supplemental Regulations Governing Certain Uses is amended to read as follows. Language in brackets and struck through [~~struck through~~] is being deleted and in **bold and underlined** is being added:

200-228 Landscaping.

A. Landscaping in nonresidential districts. Other provisions of this Part 4 notwithstanding, in any nonresidential district, the entire lot, except for areas covered by buildings or surfaced as parking, recreation or service areas, shall be seeded, sodded or planted with ground cover and suitably landscaped in accordance with an overall landscape plan consistent with the natural surroundings. All landscaping shall be properly maintained throughout the life of any use on said lot. Existing trees or landscaping located within 20 feet of any street line, lot or zoning district line shall not be removed, except upon written approval by the Planning Board, nor shall the existing grade within that space be disturbed without such approval.

B. Landscaping requirements where parking is in front yard areas.

(1) So as to obstruct from view at the street line any parking area in the front yard, the front yard area not containing parking shall contain a landscape strip or screen. Landscaped earth berms may also be used in front yard areas where there is sufficient area to allow for their construction and long term maintenance. Such landscaping shall be subject to the approval of the Planning Board and shall be maintained throughout the effective period of any certificate of occupancy on a lot.

(2) Landscaping within parking areas. Any single parking area with 50 or more spaces shall, notwithstanding other requirements of this Part 4 and Part 1, Site Plan Review, of this chapter, provide at least 5% of its area in landscaping.

C. Natural landscape area along watercourses. No building or parking area shall be located within 200 feet from the center line of any stream or within a flood hazard area, except as may be modified by Part 6 of this chapter, [~~Flood Damage and Prevention~~] **Floodplain Management Regulations**. Such area shall be deemed to be part of any landscape area or landscape transition buffer when required.

D. Screening of outdoor storage. Any article or material stored outside an enclosed building as an incidental part of the primary operation on a lot shall be so screened by fencing, walls or evergreen planting that it cannot be seen from adjoining public streets or adjacent lots when viewed by a person standing on the ground level.

Section 7. Chapter 200 of the Code of the Township of West Windsor (1999), Land Use, Part 7, Route 1 Penns Neck Business Commercial Redevelopment Area, is amended to read as follows. Language in brackets and struck through [~~struck through~~] is being deleted and in **bold and underlined** is being added.

Part 7
Route 1 Penns Neck Business Commercial Redevelopment Area

Article [~~XL~~] **XLVII**
Regulations

Section 8. SEVERABILITY.

Where any section, subsection, sentence, clause, or phrase of these regulations is, for any reason, declared by the courts to be unconstitutional or invalid, such decision shall not affect the validity of the regulations as a whole, or any part thereof, other than the part so declared.

Section 9. This ordinance shall take effect twenty days after action or inaction by the Mayor as approved by law, or an override of a mayoral vote by the Council, whichever is applicable; upon filing with the Mercer County Planning Board; and upon publication according to law.

RESOLUTION

- WHEREAS, 2023-2024 applications for renewal of liquor licenses have been submitted electronically to the Division of Alcoholic Beverage Control; and
- WHEREAS, the appropriate fees have been received; and
- WHEREAS, the Police Division and the Construction Department has indicated they find no reason to object to the renewals; and
- WHEREAS, the Health Division has inspected the premises and finds them to be in satisfactory condition; and
- WHEREAS, no objection to any of these renewals has been filed with the Clerk's Office; and
- WHEREAS, the Alcoholic Beverage Retail Licensee Clearance Certificates for Renewal have been issued.

NOW, THEREFORE, BE IT RESOLVED by the Township Council of the Township of West Windsor that the renewal of the Alcoholic Beverage Licenses for the following are hereby approved:

PLENARY RETAIL CONSUMPTION LICENSEES

- | | |
|-----------------|--|
| 1113-33-013-005 | Brick House Acquisition NJ LLC (Brick House Tavern & Tap) |
| 1113-33-001-007 | Cranbury Management Inc. (The Bog Restaurant) |
| 1113-33-016-002 | GMRI Inc. (Bahama Breeze/Seasons 52) |
| 1113-33-018-001 | Marketfair Holdings II LLC (Pocket License) |
| 1113-33-002-007 | Munson of West Windsor Wings LLC (Buffalo Wild Wings) |
| 1113-33-010-004 | OTB Acquisition of New Jersey LLC (On the Board Mexican Grill & Cantina) |
| 1113-33-012-003 | P.F. Changs China Bistro Inc. (P F Changs China Bistro) |

| 1113-44-011-006 | Wegmans Food Markets, Inc. |

Adopted: June 12, 2022

I hereby certify that the above resolution was adopted by the West Windsor Township Council at their meeting held on the 12th day of June, 2023.

Gay M. Huber
Township Clerk
West Windsor Township

RESOLUTION

WHEREAS, the Township of West Windsor, pursuant to N.J.S.A. 40A:11-12a and N.J.A.C. 5:34-7.29(c), may by resolution and without advertising for bids, purchase any goods or services under the State of New Jersey Cooperative Purchasing Program for any State contracts entered into on behalf of the State by the Division of Purchase and Property in the Department of the Treasury; and

WHEREAS, the Township of West Windsor Police Division needs to purchase equipment for criminal and traffic investigations; and

WHEREAS, Packetalk, 163 Stuyvesant Ave., Lyndhurst, NJ is an authorized vendor of this equipment under New Jersey State Contract Bergen County CO-OP 19-32, and the total cost of this equipment is \$11,000.00; and

WHEREAS, the Chief Financial Officer has certified the availability of funds in the following accounts:

NJ DOT HWY Safety Grant Funds	106-60-525A	\$9,995.22
Police-Acquisition of Equipment	405-2019-18-024	\$1,004.78

NOW, THEREFORE, BE IT RESOLVED, by the West Windsor Township Council that the Business Administrator Marlena Schmid is authorized to purchase this equipment from Packetalk under New Jersey State contract Bergen County CO-OP 19-32 in the amount of \$11,000.00.

Adopted: June 12, 2023

I hereby certify that the above Resolution was adopted by the West Windsor Township Council at their meeting held on the 12th day of June 2023.

Gay M. Huber
Township Clerk
West Windsor Township

RESOLUTION

WHEREAS, the Township of West Windsor Planning Board entered into a Professional Services Agreement with the Law Office of Gerald Muller on January 11, 2023 for Planning Board/Land Use Legal Services; and

WHEREAS, the Law Office of Gerald Muller has the expertise to perform Affordable Housing Legal Services and has done so in the past for the Township; and

WHEREAS, the Chief Financial Officer has certified funds are available for said Agreement in the following line item appropriation account:

Affordable Housing – Legal Fees	106-25-223	\$100,000.00
---------------------------------	------------	--------------

WHEREAS, the scope of work authorized in the original Agreement remains in force and effect.

NOW, THEREFORE, BE IT RESOLVED by the Township Council of the Township of West Windsor that the Chief Financial Officer is hereby authorized to increase the contract amount to date by \$100,000.00 with the Law Office of Gerald Muller for Affordable Housing Legal Fees.

Adopted: June 12, 2023

I hereby certify that the above resolution was adopted by the West Windsor Township Council at their meeting held on the 12th day of June 2023.

West Windsor Township

RESOLUTION

RESOLUTION PROVIDING FOR THE INSERTION OF A SPECIAL ITEM OF REVENUE IN THE BUDGET OF THE TOWNSHIP OF WEST WINDSOR PURSUANT TO N.J.S.A. 40A:4-87 (CHAPTER 159, P.L. 1948)

WHEREAS, N.J.S.A. 40A:4-87 provides that the Director of the Division of Local Government Services may approve the insertion of any such item of revenue in the budget of the county or municipality when such item shall have been made available by law and the amount was not determined at the time of the adoption of the budget; and

WHEREAS, the Director may also approve the insertion of any item of appropriation for equal amount.

NOW, THEREFORE, BE IT RESOLVED that the Township Council of the Township of West Windsor, in the County of Mercer, New Jersey, hereby requests the Director of the Division of Local Government Services to approve the insertion of an item of revenue in the budget of the year 2023 which item is now available as a revenue from monies held pursuant to the provisions of statute.

NJ Hospital Association Grant - 104661	\$90,214.50
--	-------------

BE IT FURTHER RESOLVED that a like sum of \$90,214.50 and the same is hereby appropriated under the following caption:

NJ Hospital Association Grant - 10660561	\$90,214.50

RESOLUTION

WHEREAS, the Township of West Windsor has a need to acquire professional engineering services; and

WHEREAS, ACT Engineers have submitted a proposal dated May 25, 2023 indicating they will provide professional engineering services for the former West Windsor Township Landfill/Compost Facility – Environmental Monitoring for \$10,000.00; and

WHEREAS, the Township wishes to enter into a Professional Services Agreement with ACT Engineers for the aforesaid services; and

WHEREAS, Certification of Funds has been received from the Chief Financial Officer and funds are available in the following line item appropriation account:

Traffic Safety Improvements Hazard Mitigation	405 2020 14 015	\$10,000.00
---	-----------------	-------------

NOW, THEREFORE, BE IT RESOLVED by the Township Council of the Township of West Windsor as follows:

- (1) The Mayor and Clerk are hereby authorized to execute, on behalf of the Township a Professional Services Agreement with ACT Engineers to cover the period June 12, 2023 through completion of the project.
- (2) The Agreement so authorized shall require the Provider to provide professional engineering services related to the remediation of the former West Windsor Township Landfill / Compost Facility, pursuant to their proposal dated May 25, 2023. The contract shall be awarded without competitive bidding as authorized by the Local Public Contracts Law pursuant to N.J.S.A. 40A:11-5(1)(a) because the services are professional in nature.
- (3) A notice of this action shall be published in the newspaper used by the Township for legal publications as required by law within ten (10) days of its passage.
- (4) An executed copy of the Professional Services Agreement between the Township and ACT Engineers and a copy of this Resolution, shall be on file and available for public inspection in the office of the Township Clerk.

Adopted: June 12, 2023

I hereby certify the above Resolution was adopted by the West Windsor Township Council at their meeting held on the 12th day of June 2023.

Gay M. Huber
Township Clerk
West Windsor Township

Township Clerk
West Windsor Township

RESOLUTION

WHEREAS, West Windsor Township was awarded a Discretionary Grant from the New Jersey Department of Transportation (NJDOT) for Fiscal Year 2021 for a project known as LA-2021 MA West Windsor Township Rabbit Hill Road Roadway Reconstruction; and

WHEREAS, right-of-way acquisition has been determined to be necessary to achieve the project goals, which has delayed design and award of a contract for the project; and

WHEREAS, under the New Jersey Department Of Transportation grant guidelines an extension of time request must be filed if a construction contract is not awarded by the end of 2022; and

WHEREAS, a time extension was approved by New Jersey Department of Transportation for the project till May 2023, but due to continuing right of way concerns a construction contract for the project has not been awarded; and

WHEREAS, under the New Jersey Department Of Transportation guidelines an extension of time request must be filed if a construction contract is not awarded by May of 2023; and

WHEREAS, the Township Council of the Township of West Windsor anticipates awarding a construction contract by August of 2023; and

WHEREAS, the Township Engineer recommends a three (3) month further time extension be requested from the New Jersey Department Of Transportation.

NOW, THEREFORE, BE IT RESOLVED the Township Council of the Township of West Windsor hereby authorizes the Township Clerk to sign the New Jersey Department of Transportation three (3) month extension request on behalf of West Windsor Township for the project known as LA-2021 MA West Windsor Township Rabbit Hill Road Roadway Reconstruction via the New Jersey Department of Transportation electronic system.

Adopted: June 12, 2023

I hereby certify this is a true copy of a Resolution adopted by the West Windsor Township Council at its meeting held on the 12th day of June, 2023.

Gay M. Huber
Township Clerk
West Windsor Township

RESOLUTION

- WHEREAS, LEAD Freedom Fest State Fair desires to conduct public fireworks displays located at Mercer County Park on June 30th, July 3rd, July 4th, and July 8th, 2023, with no rain date established; and
- WHEREAS, said fireworks displays shall be conducted by Schaefer Fireworks, a U.S. Department of Treasury, Bureau of Alcohol, Tobacco, and Firearms licensed Importer of Fireworks, license number 8-PA-071-51-5H-03191; and
- WHEREAS, the New Jersey Uniform Fire Code N.J.A.C. 5:70-3, 5601.2.4.3 requires that the governing body approve said fireworks display by resolution prior to granting of a permit by the Township Fire Marshal; and
- WHEREAS, the Township Fire Marshal has designated the fireworks displays must commence by 9:30 p.m. and conclude no later than 10:00 p.m.; and
- WHEREAS, the minimum insurance coverage required by N.J.A.C. 5:70, 5601.2.4.2 is \$500,000 and Schaefer Fireworks carries \$5,000,000 insurance coverage; and
- WHEREAS, the Fire Marshal has communicated with the Chief of Police, and the Fire Chief of West Windsor Volunteer Fire Company #1, who will provide police, and fire protection for said fireworks displays and have given their approval; and
- WHEREAS, West Windsor Fire and Emergency Services Division will provide emergency medical services; and
- WHEREAS, the Fire Marshal has reviewed the application for a fire safety permit, insurance requirements, and other applicable regulations and has found all to be in order; and
- WHEREAS, the Fire Marshal recommends the approval of said resolution;
- NOW, THEREFORE BE IT RESOLVED, by the Township Council of the Township of West Windsor, that this resolution is approved and that a permit may be granted by the West Windsor Township Fire Marshal, upon his approval, for the above fireworks displays.

Adopted: June 12, 2023

I hereby certify that the above resolution was adopted by the West Windsor Township Council at their meeting held on the 12th day of June, 2023.
